60 Our story
Studio and label

Music is one of the few truths that needs no explanation. It bypasses language, flows around logic, and goes straight to the heart. At Marten, our mission has always been to craft speakers that reveal music in its purest form.

Every component is carefully selected, every material chosen for its quality, and every detail considered in service of the music. Dexter is the latest expression of that commitment — four models built around technologies developed at the very top of our range, and a series that exceeded our own expectations during development.

For us, it's not about hearing more. It's about hearing what was always there.

INTRODUCING

DEXTER

A new series for 2026

There are speakers that reproduce music, and there are speakers that reveal it. Dexter was built for the latter — for listeners who know the difference, and for those who are about to discover it. It began as one thing and became another. The bass system, the cabinet, the tweeter: each pushed beyond what we had originally planned. A series that went further than we set out to go, and that surprised us when it did.

DEXTER QUARTET

DEXTER QUINTET

DEXTER TRIO

THE DETAIL

FOUR MODELS

Three floorstanders and a stand speaker, each sharing the same carbon fibre laminate faceplate and the same pure diamond tweeter — a design informed by the work done on Coltrane Supreme Extreme, but developed specifically for this series. A new triple-layer M-Core cabinet construction and an entirely new approach to bass loading complete the picture. Dexter is available in four finishes, led by True Grain Oak — a material new to Marten and exclusive to the series.

See page 26

DEXTER DUO

COLTRANE

The Coltrane series represents the pinnacle of our craftsmanship. Every model in this series is a statement of technical excellence, featuring meticulously selected components and handcrafted details. With custom drivers, advanced crossover designs, and materials of the highest calibre, the Coltrane series delivers the most refined listening experience. These speakers set a new standard in power, dynamics, and control—created for those who demand the ultimate in sound reproduction.

COLTRANE

SUPREME EXTREME

Coltrane Supreme Extreme represents the pinnacle of our craftsmanship and engineering. Every aspect of this speaker is designed to provide the purest listening experience possible. Its five-way design, featuring custom diamond tweeter and midrange drivers, the largest beryllium driver ever created, and Crystalid mid-bass drivers, offers a clarity and definition previously unattainable.

A suite of aluminium sandwich bass drivers ensures deep, controlled low frequencies with extraordinary clarity. The unique first-order crossover delivers perfect time and phase coherence across the entire frequency range.

The carbon fibre monocoque, dual-tower cabinet is another innovation, providing an acoustically inert structure that allows sound to flow naturally. Combining solid wood and aluminium sandwich construction, the cabinet minimises vibrations and resonance, ensuring that sound is pure and undistorted.

To ensure the highest level of fidelity, this model is equipped with Jorma Paragon internal wiring, delivering exceptional signal purity. Every element, from the choice of materials to the design process, is carefully considered, making Coltrane Supreme Extreme a speaker that brings you closer to the artist's intent with extraordinary precision.

FEATURES

- 5-way, dual-tower
- 1" pure diamond tweeter
- 3" pure diamond high midrange
- 7" pure beryllium midrange
- 8" Crystalid mid-bass
- 10" Aluminium sandwich bass
- 10" Aluminium sandwich passive radiator
- First order crossover
- Custom-built crossover components
- Carbon fibre monocoque cabinet
- Solid wood and aluminium sandwich construction
- Custom speaker terminals
- Jorma Paragon internal wiring
- Marten Isolators

See page 53 for finishes

PARAGON

Coltrane Supreme Extreme features Jorma Paragon internal wiring—the most advanced we've ever used. Hand-built in Sweden, it delivers the signal with exceptional purity, control and detail.

COLTRANE

Supreme 2

Coltrane Supreme 2 MK 2 is a testament to our commitment to delivering natural, dynamic sound. Featuring custom pure diamond tweeters and specially engineered drivers, this speaker provides exceptional clarity and precision. The dual-layer carbon fibre cabinet ensures excellent bass control, reducing unwanted resonance for a cleaner, more transparent sound. With six passive radiators, Coltrane Supreme 2 MK 2 offers a bass response that is tight and dynamic.

Its three-part cabinet structure isolates the treble and midrange frequencies from the bass, allowing for optimal performance in each frequency range. The first-order crossover ensures perfect phase coherence, providing a seamless listening experience where every element of the music is in balance.

Crafted with world-class woodwork and Jorma Statement internal wiring, Coltrane Supreme 2 MK 2 ensures exceptional signal purity. Combined with Marten Isolators to reduce distortion, it delivers an immersive, distortion-free listening experience that captures the true essence of every performance.

FEATURES

- 5-way
- 0.75” pure diamond high tweeter
- 2” pure diamond low tweeter
- 4” ceramic midrange
- 8” aluminium sandwich bass
- 10” aluminium sandwich passive radiator
- Dual layer carbon fibre cabinet
- 3 part cabinet for bass and midrange isolation
- World-class woodwork
- First order crossover
- Jorma Statement internal wiring
- Marten Isolators

See page 53 for finishes

STATEMENT

Coltrane Supreme 2 Mk2 features Jorma Statement internal wiring and our most advanced crossover with the highest quality components.

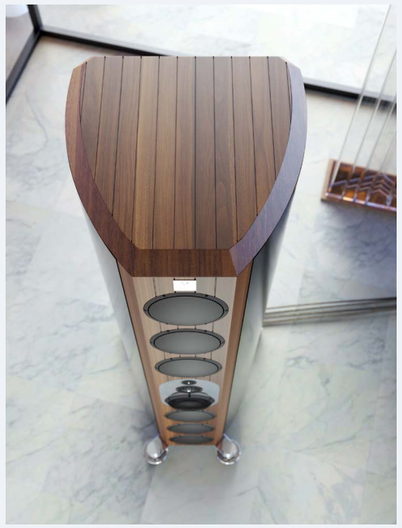
COLTRANE

Momento 2

Coltrane Momento 2 represents a finely tuned balance between technology and artistry. Featuring custom pure diamond drivers, it delivers a sound that is rich, expansive, and full of life. The first-order crossover ensures time and phase coherence, while the custom-engineered cabinet reduces resonance, maintaining clarity and precision.

The result is a speaker that offers an exceptional sense of depth, with a transparent soundstage that brings every detail to life. Jorma internal wiring and Marten Isolators complete the design, ensuring the purest, most natural listening experience possible.

Coltrane Momento 2 is designed for those who appreciate the beauty of sound and demand a speaker that faithfully reproduces every detail of the music, no matter how subtle.



FEATURES

- 4-way
- 0.75” pure diamond high tweeter
- 2” pure diamond low tweeter
- 7” ceramic midrange
- 8” aluminium sandwich bass
- 10” aluminium sandwich passive radiator
- Dual layer carbon fibre cabinet
- World-class woodwork
- First order crossover
- Jorma internal wiring
- Marten Isolators

See page 54 for finishes

STATEMENT EDITION

Coltrane Momento 2 can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

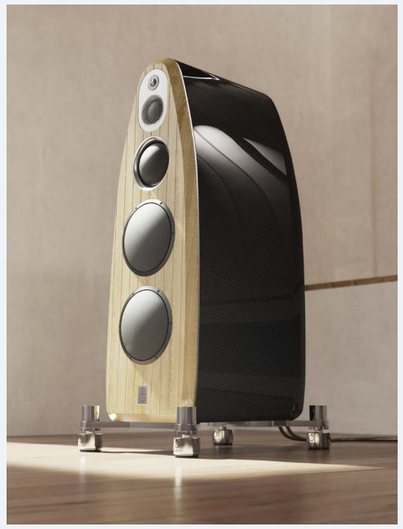
COLTRANE

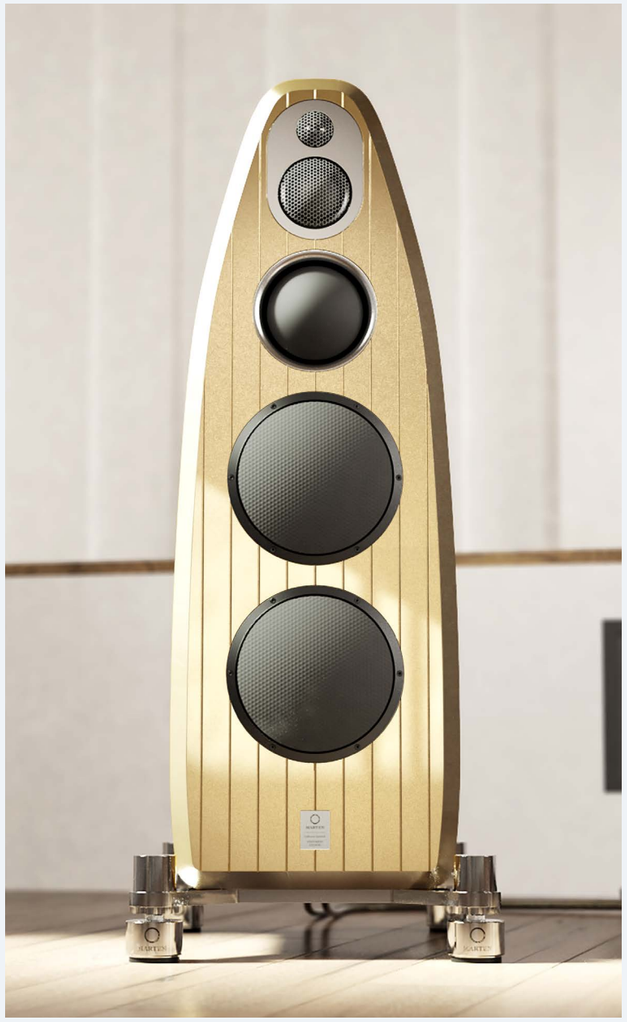
Quintet

Coltrane Quintet blends advanced technology with our heritage of craftsmanship. The speaker features custom pure diamond tweeters, custom pure beryllium high-midrange drivers, and custom convex carbon fibre mid-bass drivers to capture every detail of the performance. The 10” aluminium sandwich bass drivers ensure deep, controlled bass that adds fullness to the sound without sacrificing clarity.

The signature first-order crossover and crossover components provide unparalleled accuracy and minimal distortion, allowing each frequency to come through naturally. The speaker’s rigid cabinet construction ensures that resonance is reduced, providing an accurate and pure listening experience.

Coltrane Quintet’s performance excels in both large and small spaces, offering a wide soundstage with a rich, balanced sound that reveals every layer of a performance. With Jorma internal wiring and Marten Isolators, this model ensures the highest signal fidelity, capturing every nuance of the music in its purest form.





FEATURES

- 4-way bass reflex
- 1” pure diamond tweeter
- 3” pure beryllium high-midrange
- 7” convex carbon fibre mid-bass
- 10” Aluminium sandwich bass
- Signature First Order crossover
- Jorma internal wiring
- Marten Isolators

See page 54 for finishes

STATEMENT EDITION

Coltrane Quintet can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

MINGUS

EST
MADE IN
SWEDEN
1998

The Mingus series strikes the perfect balance between performance and design. Combining our signature technologies, such as pure diamond drivers and custom-built crossovers, Mingus delivers exceptional clarity, deep bass, and a distortion-free soundstage. Built with high-quality materials and a design that blends elegance and power, the Mingus series offers an extraordinary listening experience, ideal for those who demand premium performance.

MINGUS

Orchestra

Mingus Orchestra represents the pinnacle of the Mingus series. Featuring pure diamond and a suite of custom drivers, this speaker delivers an expansive, distortion-free sound with exceptional clarity and depth. The first-order crossover ensures impeccable time coherence, allowing the music to flow naturally and effortlessly across the full frequency range.

The acoustically optimised cabinet ensures perfect resonance control and precision, while Jorma internal wiring offers the highest level of signal fidelity. With Marten Isolators to reduce unwanted vibrations, Mingus Orchestra provides a true-to-life listening experience, making it the perfect speaker for audiophiles who demand absolute transparency and accuracy in their sound reproduction.

FEATURES

- 4-way bass reflex
- 0.75” pure diamond high tweeter
- 2” pure diamond low tweeter
- 7” ceramic midrange
- 8” aluminium sandwich bass
- 10” aluminium sandwich passive radiator
- First order crossover
- Jorma internal wiring
- Marten Isolators

See page 55 for finishes

STATEMENT EDITION

Mingus Orchestra can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

MINGUS
Septet

Mingus Septet takes performance to the next level with its seven custom drivers, including pure diamond tweeters and beryllium midrange drivers. The advanced damping system and resonance-free cabinet ensure that every note is delivered with remarkable clarity and detail. The dynamic range and precision of Mingus Septet allow it to faithfully reproduce even the most intricate musical passages, while the deep bass provides a full and immersive listening experience.

This speaker is designed for those who want to experience music as close to the live performance as possible, offering both immense power and fine detail.

FEATURES

- 4-way
- 1” pure diamond tweeter
- 3” pure beryllium high midrange
- 7” ceramic mid-bass
- 8” aluminium sandwich bass
- 10” aluminium sandwich passive radiator
- First order crossover
- Jorma internal wiring
- Marten Isolators

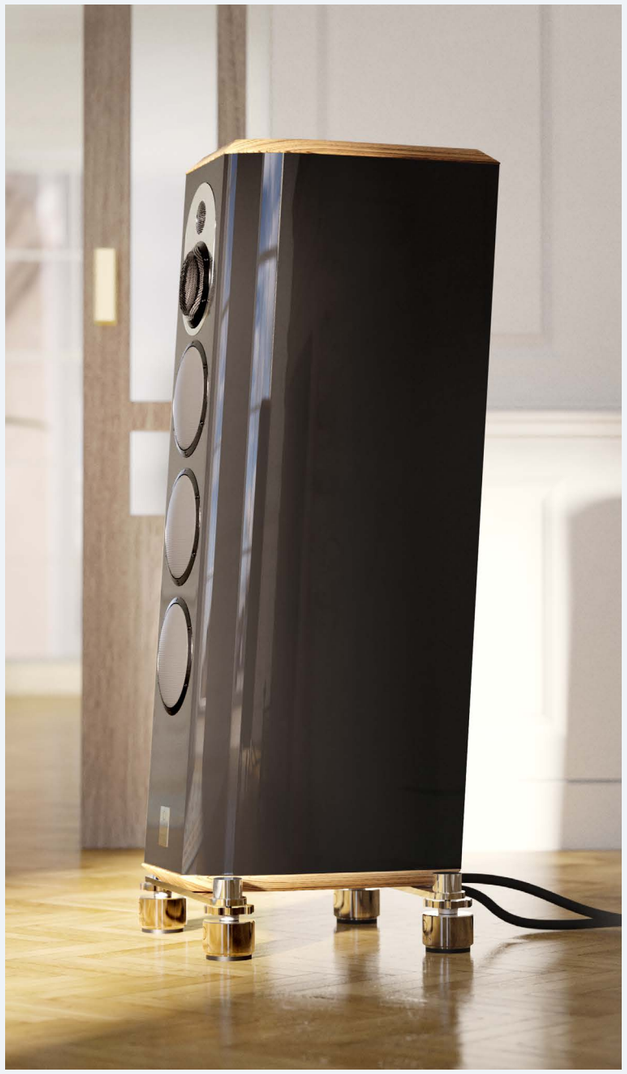
See page 55 for finishes

STATEMENT EDITION

Mingus Septet can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

MINGUS

Quintet 2



Mingus Quintet 2 offers controlled, precise performance with diamond tweeters, custom drivers, and a first-order crossover. The multi-layer cabinet ensures excellent resonance control, delivering deep bass and a natural midrange.

The result is a speaker that offers a balanced and natural sound, bringing out the best in any recording. Whether you're listening to orchestral works or contemporary music, Mingus Quintet 2 delivers an immersive listening experience with impeccable clarity and depth.

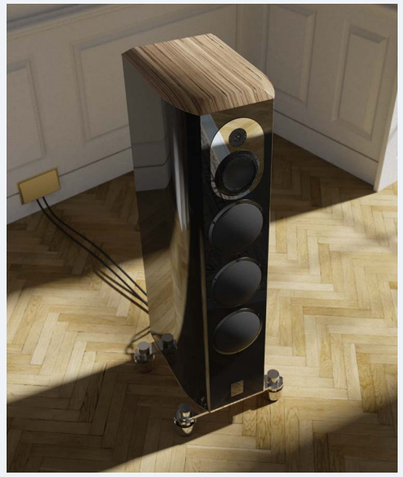
FEATURES

- 3-way bass reflex
- 0.75" pure diamond tweeter
- 5" ceramic midrange
- 7" aluminium sandwich bass
- First order crossover
- Jorma internal wiring
- Marten Isolators

See page 55 for finishes

STATEMENT EDITION

Mingus Quintet 2 can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.



NEW SERIES

DEXTER

EST

MADE IN SWEDEN

1998

DEXTER

NEW SERIES
2026

Music rewards patience. The ideas behind Dexter have been in development for over two years — a process that exceeded what was originally planned at every stage. The result is a series that surprised even its designer: bass with depth and dynamics that changed the direction of the final tuning, a tweeter of exceptional transparency and resolution, and a dedicated midrange that opened up the performance of the upper two models beyond what was anticipated.

Dexter brings a pure diamond tweeter to four models, each built around an M-Core triple-layer cabinet and a new bass loading system unique to this series. Four models, one consistent voice — for those coming to Marten for the first time, and for those who already know exactly what they are listening for.

DEXTER

QUINTET

For those who want the complete Dexter experience, without concession.

Dexter Quintet is the flagship of the series. A pure three-way design, it features a pure diamond tweeter with smooth, clean treble and the resolution to reveal everything the recording holds. Carbon fibre bass drivers bring deep, controlled low frequencies. At the heart of the design, a ceramic midrange — designed by Marten — whose transparency and control define its tonal character.

The M-Core cabinet delivers exceptional damping and resonance control, with a triple-layer sandwich construction. A carbon fibre laminate faceplate surrounds the tweeter and midrange, improving resonance control — a detail shared with Coltrane Supreme Extreme.

Bass is managed by a new system that combines bass reflex and transmission line principles, the realisation of a defining design ambition. A shaped internal channel exits through a wide downward-firing slot, reducing air velocity and delivering controlled, deeply extended output. Room placement flexibility is considerably greater than conventional ported designs allow.

DESIGNED BY MARTEN

Every driver in Dexter Quintet is designed by Marten. The diamond tweeter and ceramic midrange are where that work goes furthest — drivers that demanded more in their development than any we have produced before.

FEATURES

- 3-way
- Loaded Reflex Line bass system
- 1” Marten pure diamond tweeter
- 3.5” Marten ceramic midrange
- 9.5” Marten carbon fibre bass
- M-Core triple-layer cabinet
- Carbon fibre laminate faceplate
- Multi-diverse crossover
- Pure copper rhodium plated terminals
- Jorma Duality internal wiring
- Marten Isolator with adjustable height ring

Shown in True Grain Oak and Piano Walnut. Available in four finishes — see page 56.

STATEMENT EDITION

Dexter Quintet can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

DEXTER

QUARTET

For those who want the full series character in a room where scale matters

Dexter Quartet shares its architecture with Quintet: the same pure diamond tweeter, the same carbon fibre bass driver, the same ceramic midrange. The experience of listening is closely related. For rooms where Quintet's proportions exceed what the space calls for, Quartet delivers the essential character of the series without concession in the frequency ranges that define it.

The M-Core cabinet and carbon fibre laminate faceplate carry over from Quintet. The new bass loading system — with its downward-firing slotted port — is equally present in Quartet, delivering controlled, deeply extended bass with greater flexibility in room placement.

Marten Isolators with adjustable height rings are standard across the series. This component was previously reserved for Coltrane Supreme Extreme.

DESIGNED BY MARTEN

Every driver in Dexter Quartet is designed by Marten. The diamond tweeter and ceramic midrange are where that work goes furthest — drivers that demanded more in their development than any we have produced before.

FEATURES

- 3-way
- Loaded Reflex Line bass system
- 1" Marten pure diamond tweeter
- 3.5" Marten ceramic midrange
- 9.5" Marten carbon fibre bass
- M-Core triple-layer cabinet
- Carbon fibre laminate faceplate
- Multi-diverse crossover
- Pure copper rhodium plated terminals
- Jorma Duality internal wiring
- Marten Isolator with adjustable height ring

Shown in True Grain Oak and Piano Walnut. Available in four finishes — see page 56.

STATEMENT EDITION

Dexter Quartet can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

DEXTER

TRIO

For those who want real floorstander performance in a more compact form

Dexter Trio is a 2.5-way floorstander that carries the defining elements of the series into a more compact form. The pure diamond tweeter — standard across every Dexter model — ensures that the transparency and resolution the range is built around are fully present here.

The M-Core cabinet delivers exceptional damping and resonance control. A carbon fibre laminate faceplate surrounds the tweeter, improving resonance control — a detail drawn from Coltrane Supreme Extreme and present across every model in the series. The downward-firing bass system delivers controlled, extended output and allows greater flexibility in room placement. Trio works with its environment rather than demanding particular conditions from it.

FEATURES

- 2.5-way
- Loaded Reflex Line bass system
- 1” Marten pure diamond tweeter
- 7.5” Marten ceramic mid/bass × 2
- M-Core triple-layer cabinet
- Carbon fibre laminate faceplate
- Multi-diverse crossover
- Pure copper rhodium plated terminals
- Jorma Duality internal wiring
- Marten Isolator with adjustable height ring

Shown in True Grain Oak and Piano Walnut. Available in four finishes — see page 56.

STATEMENT EDITION

Dexter Trio can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

DESIGNED BY MARTEN

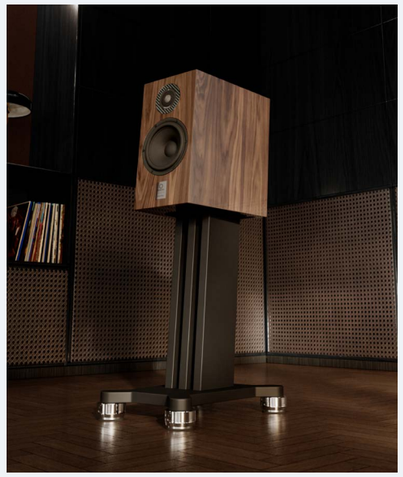
Every driver in Dexter Trio is designed by Marten. The diamond tweeter is the same driver found across the entire series — the element above all others that gives Dexter its consistent voice.

DEXTER
DUO

For those who want everything Dexter offers from a stand speaker

Dexter Duo is a two-way stand speaker and the entry point to the series. Its diamond tweeter is the same driver found in all Dexter models — there is no lesser version. What changes across the range is scale and driver count; the intent is constant.

The M-Core cabinet delivers exceptional damping and resonance control. A carbon fibre laminate faceplate surrounds the tweeter, consistent with every model in the series, improving resonance control. The downward-firing port system allows greater flexibility in setup, making it easier to find the right position in the room.



FEATURES

- 2-way
- Loaded Reflex Line bass system
- 1” Marten pure diamond tweeter
- 7.5” Marten ceramic mid/bass
- M-Core triple-layer cabinet
- Carbon fibre laminate faceplate
- Multi-diverse crossover
- Pure copper rhodium plated terminals
- Jorma Duality internal wiring
- Custom stand with Marten Isolators (optional)

Shown in True Grain Oak and Piano Walnut. Available in four finishes — see page 56.

STATEMENT EDITION

Dexter Duo can be upgraded to Statement Edition, featuring Jorma Statement internal wiring and highest quality crossover components.

DESIGNED BY MARTEN

Every driver in Dexter Duo is designed by Marten. The diamond tweeter is the same driver found across the entire series — the element above all others that gives Dexter its consistent voice.

PARKER

The Parker series marks a significant step forward in speaker design. Custom-designed drivers and advanced crossover techniques afford Parker speakers exceptional dynamics and clarity. With a resonance-free design and premium materials, Parker provides an impressive listening experience, offering an ideal balance of performance and value. Parker speakers deliver rich, controlled sound that is perfect for a variety of listening spaces.

PARKER

Quintet

Parker Quintet is a high-performance floorstanding speaker designed to deliver exceptional sound in any room. With custom-designed drivers and an advanced crossover, it offers a precise and dynamic performance across all frequencies. The resonance-free cabinet construction ensures that unwanted vibrations are kept to a minimum, providing a clear, clean sound across the entire spectrum.

With tight bass and a wide soundstage, Parker Quintet offers an immersive listening experience that brings the music to life, revealing every detail and nuance.

FEATURES

- Multi-diverse crossover technique
- 1” ceramic tweeter
- 7.5” ceramic mid-bass
- 9” aluminium sandwich passive radiator
- Jorma internal wiring
- High sensitivity
- M-board multi-layered cabinet
- Marten Isolators

See page 57 for finishes

DIAMOND EDITION

Parker Quintet can be upgraded to Diamond Edition, featuring a pure diamond tweeter, Jorma Statement internal wiring, more advanced crossover components and improved terminals.

PARKER

Trio

Parker Trio is a compact 2.5-way floorstanding speaker that brings exceptional performance into a smaller package. With custom drivers and an advanced crossover, it delivers a dynamic sound with impressive bass response and clarity. The resonance-free cabinet ensures clean, precise sound, while the speaker's sleek design blends seamlessly into any living space.

Parker Trio offers a rich, detailed soundstage with tight, controlled bass, delivering high-end performance in a more compact form.

FEATURES

- Multi-diverse crossover technique
- 1" ceramic tweeter
- 7.5" ceramic mid-bass
- 9" aluminium sandwich passive radiator
- Jorma internal wiring
- High sensitivity
- M-board multi-layered cabinet
- Marten Isolators

See page 57 for finishes

DIAMOND EDITION

Parker Trio can be upgraded to Diamond Edition, featuring a pure diamond tweeter, Jorma Statement internal wiring, more advanced crossover components and improved terminals.

PARKER

Duo

Parker Duo is a bookshelf speaker that offers an exceptional sound in a compact design. Featuring custom drivers and a resonance-free construction, Parker Duo delivers tight bass and a wide soundstage. Its clear, detailed sound ensures an immersive listening experience. Designed for those who want high-fidelity audio in a smaller package, Parker Duo brings our signature sound into a more accessible form.

FEATURES

- Multi-diverse crossover technique
- 1” ceramic tweeter
- 7.5” ceramic mid-bass
- 9” aluminium sandwich passive radiator
- Jorma internal wiring
- High sensitivity
- M-board multi-layered cabinet
- Custom stand with Marten Isolators (optional)

See page 57 for finishes

DIAMOND EDITION

Parker Duo can be upgraded to Diamond Edition, featuring a pure diamond tweeter, Jorma Statement internal wiring, more advanced crossover components and improved terminals.

OSCAR

EST
MADE IN
SWEDEN
1998

The Oscar series exemplifies our dedication to exceptional craftsmanship and sound, offering high-fidelity audio in a more accessible form. With carefully engineered drivers and an optimised cabinet design, Oscar delivers a sound that is both clear and dynamic, with well-controlled bass that complements any musical genre. Its design seamlessly blends elegance with practicality, making it an ideal choice for those who value premium sound quality in a versatile and visually appealing package. The Oscar series offers an immersive listening experience, providing our signature sound at a level that suits a wider range of listeners.

OSCAR
Trio

Oscar Trio brings our renowned craftsmanship and sound quality to a wider audience. Featuring custom-designed drivers and an optimised build, Oscar Trio delivers dynamic sound with remarkable clarity and controlled bass. The speaker's design is both elegant and functional, making it an ideal choice for anyone seeking high-quality audio without compromise. Oscar Trio is perfect for those who appreciate premium sound at a more accessible level.

FEATURES

- 1" ceramic tweeter
- 6.5" ceramic bass
- True Marten sound
- 2-way
- Jorma internal wiring
- Competitive price-point

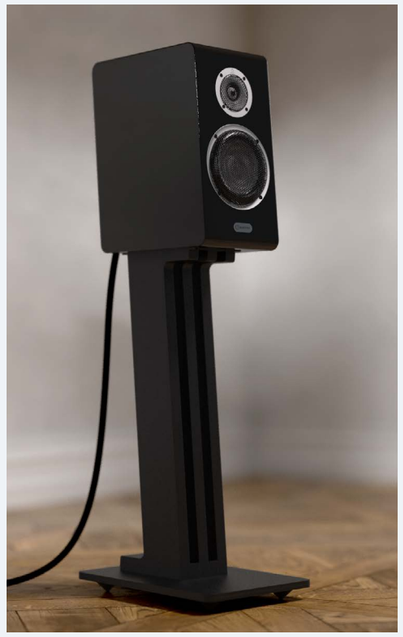
See page 57 for finishes

UPGRADE

- Magnetic cover
- Marten Isolators

OSCAR
Duo

Oscar Duo is a bookshelf speaker that delivers an exceptional listening experience in a compact form. With custom-designed drivers and a refined cabinet, Oscar Duo offers clear, balanced sound with tight bass and a wide soundstage. Its resonance-free design ensures accurate, dynamic reproduction, making it an excellent choice for those who want a premium audio experience from a stand speaker.



FEATURES

- 1” ceramic tweeter
- 6.5” ceramic bass
- True Marten sound
- 2-way
- Jorma internal wiring
- Competitive price-point

See page 57 for finishes

UPGRADE

- Custom stand
- Magnetic cover
- Marten Isolators

MARTEN ISOLATORS

Reducing resonance is crucial to achieving exceptional sound quality. With Marten Isolators we have taken this to a new level, isolating the speaker completely from the floor and delivering unparalleled soundstage clarity.

PROTECT YOUR SOUND

Distortion and resonance are two key factors that can impact the sound quality of even the most high-end speakers. While our precision materials and finely-tuned components go a long way in reducing these factors, the speaker's position on a supporting surface can create its own resonance issues, resulting in a muddy soundstage.

QUALITY AS STANDARD

To tackle this challenge, we partnered with audio isolation experts, IsoAcoustics, to create Marten Isolators. These innovative isolators work by preventing vibrations from travelling down to the floor, effectively isolating the speaker from the room. This ensures that the floor cannot resonate unwanted sound back up into the speaker, reducing resonance and distortion, and eliminating dissonant sounds in the listening area.

FEATURES

- Dynamic bass with increased power and control
- Natural openness and clarity
- Optimised for cabinet weight
- Resists lateral movement and oscillations
- Reduces internal reflections

FINISHES

Our finishes are carefully selected to ensure that the visual appeal of your speaker is as naturally suited to your home as your music.

COLTRANE SUPREME EXTREME

Matte Walnut | Matte Cherry | Matte Oak | Matte Maple

Cabinet body finished in Piano lacquered clear coat carbon fibre.

COLTRANE SUPREME 2 MK2

Matte Walnut | Matte Cherry | Matte Oak | Matte Maple

Cabinet body finished in Piano Black lacquered carbon fibre.

FINISHES

Models not to scale. Finishes are for representation purposes only.

COLTRANE MOMENTO 2

Matte Walnut | Matte Cherry | Matte Oak | Matte Maple

Cabinet body finished in Piano Black lacquered carbon fibre.

COLTRANE QUINTET

Matte Walnut | Matte Oak | Piano Black | Piano Grey

Piano Plum | Piano Red | Piano Gold

Cabinet body finished in Piano lacquered clear coat carbon fibre *or* Piano Black lacquered carbon fibre.

MINGUS ORCHESTRA

Matte Walnut | Matte Oak | Matte Zebrano | Piano Black | Piano Grey | Piano Plum | Piano Red | Piano Gold

Cabinet body finished in Piano Black lacquer

MINGUS SEPTET

Matte Walnut | Matte Oak | Matte Zebrano | Piano Black | Piano Grey | Piano Plum | Piano Red | Piano Gold

Cabinet body finished in Piano Black lacquer

MINGUS QUINTET 2

Matte Walnut | Matte Oak | Matte Zebrano | Piano Black | Piano Grey | Piano Plum | Piano Red | Piano Gold

Cabinet body finished in Piano Black lacquer

FINISHES

Models not to scale. Finishes are for representation purposes only.

DEXTER QUINTET

	Dexter Quartet 3 way floorstander	
	Dexter Trio 2.5 way floorstander	
	Dexter Duo 2 way stand speaker	

COMPANY

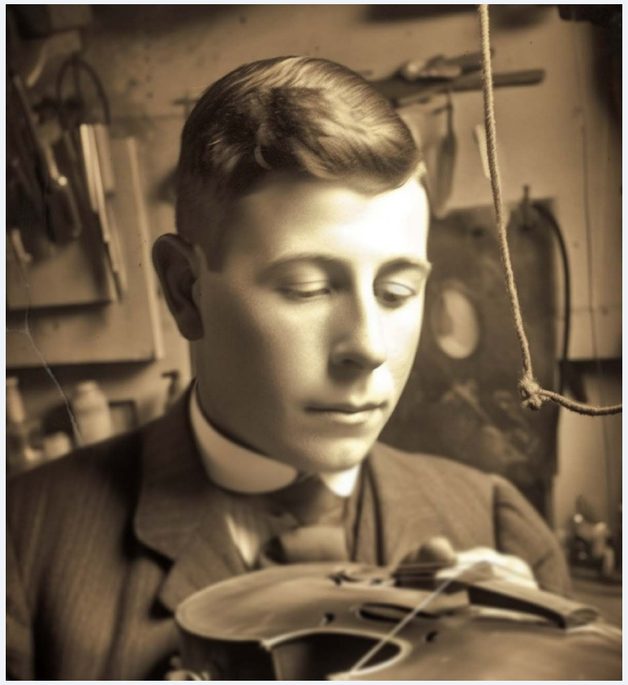
Our Story

In 1998, Leif Mårten Olofsson founded Marten in Sweden, but the company's history goes back much further than that. Leif's grandfather, Josef Olofsson, crafted violins modelled after Stradivarius in the early 1900s. An instrument that was also played by Mårten Larsson, Leif's maternal grandfather.

Leif's passion for speaker design began in the 1970s, when he made his first speakers in the family home. A hobby which keenly interested him from an early age. After Leif obtained his degree in electrical engineering, he started a career in kitchen design. On the side, he continued his true passion for speakers. He developed formative designs that would later serve as sketches for what would become Marten speakers.

Starting with the original Mingus model, Marten's product line has expanded, growing stronger with each iteration. The company's success and respect have grown steadily over time, fueled by Leif's dedication to create speakers that accurately reproduce the truth and beauty of natural sound. Leif's desire to hear music as it is in real life, free of distortion or artificial colouring, is at the core of the Marten ethos.

This vision has driven the company's product design and development from the beginning and continues to do so today. Despite its growth and success, Marten remains a family business, with Leif and his brothers, Jörgen and Lars Olofsson at the helm.



Josef Olofsson recreated with archive photos and Midjourney AI

COMPANY

Studio & Label

Marten speakers have always been designed with a deep appreciation for music and a commitment to delivering sound in its truest form.

In 2013, the company took this passion to the next level by building its own recording studio at its offices in Sweden, with the reference model Coltrane Supreme 2 as its inspiration. This dual microphone studio allowed Marten to create its first recording album, Supreme Sessions, which bridged the gap between live music and the home listening experience.

Thanks to this studio, Marten has been able to produce high-fidelity recordings, released on its own record label: Marten Recordings. The label has worked with a variety of talented artists, including Rhythm Art Duo, Matti Ollikainen, and Duo Granmo Berg.

In 2026, Marten moved to new and larger premises nearby. A new recording studio, integrated into the main listening room, is currently under development — the next chapter in a relationship with music that has always been central to how we build speakers.

MARTEN
RECORDINGS

*“With Dexter, we knew what we wanted to build.
What surprised us was what it became.”*

Leif Olofsson • Chief Designer, Marten
