SUPER AUDIO CD/CD PLAYER
The R-01X is a 20,000Hz ± 0.001% precision
clock generator. It is designed to provide
the most accurate and stable reference
frequency for digital audio processing.
The R-01X is available in two models:
R-01X (Standard) and R-01X (Limited Edition).
The R-01X (Limited Edition) is available
only in Japan. For more information,
please contact Esoteric Audio.

New Vintage

Heritage

Back in 1953, Mr. Katsuma Tani, one of the founders of the TEAC Corporation, started up a new business: designing and manufacturing tape recorders. His motivation was his fascination with magnetic recording technology combined with a passion to change the world of recording.

The TD-102, launched in 1957, was the very first product to wear the TEAC badge. Since then TEAC has developed thousands of models and produced millions of units for the consumer electronics and professional audio markets. Today's recording media and methods of recording may have changed but the abiding passion of our founder is deeply embedded and ever present in every product we create.
