

# B BUS Cu

Metallurgy, geometry, dielectric & termination methods can vary greatly in USB cables. Our copper based solutions deliver sonically superior results over “in the box” cables. The difference is clearly audible and closer to Kimber Kable’s definition of musical.

## Connector Options

USB Type A

USB Type B

## Features

### B BUS Cu

- Silver-plated (6.1%) signal conductors.
- Maximum gauge signal and power conductors.
- High-density polyethylene signal conductor dielectric.
- Ferrite noise reduction beads.
