“...a level of musicality that will make even diehard analog fans forget its computer roots...A1st off to the new A1st on the block.”

Lumin is the network player by which all others should be judged.

Its soundstage and imaging capabilities surpass anything I have heard in the digital domain.

Had I not known better, I would have sworn I was listening to master tapes.

Today I consider the Lumin app to be the most complete alliance of browsing and pure audio functions I have experienced yet.

...the app is one of the best out there on any streamer I've used so far.
