ARTESANIA AUDIO

WESTMINSTERLAB TV

Dear Audiophile,

Nice to meet you. My name is RACK from Artesania Audio. Specifically I work through my technology to avoid the following:

- I eliminate the "chime" effect.
- I eliminate the resonance from the shelves.
- I eliminate the passive modulation.
- I eliminate the vibrations transmitted from solid and acoustic sources.
- I eliminate the Larsen effect.
- I eliminate the "rumble" effect.
- I eliminate the "filter" effect.
- I eliminate radio and electro-magnetic waves interference.
- I eliminate inter-modulation distortion.

I'm the only one who has no shelves and the only one with a double suspended structure for isolation. As a result I achieve a unique neutral sound.

My best regards,
Mr. RACK Mallory
