

NAGRA CLASSIC DAC

Digital to analog converter

Following the world acclaimed HD DAC considered a reference in D/A conversion, Nagra has worked extensively to provide a more affordable version as part of the CLASSIC range.

The new CLASSIC DAC makes use of the exact same digital front-end as the HD DAC (digital input board, USB module and D/A boards).

On the output stage the HD DAC's tube is replaced by a discreet transistor topology, using matched military grade components.

Main features

- ▶ PCM up to 384 kHz / 24 bits and DSD 2x compatible
- ▶ 2x S/PDif (RCA and BNC), 1x AES-EBU, 1x TOSlink, 1x I2S Nagra digital inputs
- ▶ Nagra USB input module
- ▶ RCA and XLR outputs
- ▶ Built-in mains power supply and Lemo 12 V DC input for improved performance with the Nagra MPS full chassis power supply
