

SRE-750H / SRE-725H

Extension cable for Earspeakers

HiFC (high efficiency pure copper wire) extension cable exclusive for STAX earspeakers !

● SRE-750H (5m)

● SRE-725H (2.5m)

Along with this, SRE-750/725 will be discontinued.

Features

- High-performance HiFC cable, already adopted for some STAX earpeaker, has been employed as wire material.
- HiFC is the registered trademark of high efficiency pure copper wire which was developed by Hitachi Metal company. Continuity casting has been made possible by adding very small quantity of titanium to copper in order to control included impurities, resulting in high conductivity and outstanding durability with little aged deterioration.
- The balanced tone quality features very natural sound with little coloring and reproduces faithfully from low to high frequencies.
- The change of tone quality produced by extending cable is suppressed to minimum.
