Hi-Fi Audio Components

USB DAC/Network Player
UD-701N

An advanced all-around unit that fascinates every audiophile. Combining newly-developed TEAC ΔΣ (Delta Sigma) discrete DACs, network function, pre-amplifier, and headphone amplifier at higher dimension, this new full-size USB DAC behaves as a core of your audio system, allowing you audio streaming from a PC/NAS or music subscription services on Internet, analog balance input and excellent headphone listening.

- THD: 0.005% ●S/N Ratio: 110dB ●Frequency Response: 5Hz to 80kHz ●Digital Inputs: USB Audio, LAN, Coaxial Digital x2, Optical Digital x2, Bluetooth® ●USB Flash Memory ●Analog Inputs: XLR Balanced, RCA Unbalanced ●Clock Input: 10MHz ●Analog Outputs: XLR Balanced, RCA Unbalanced ●Power Consumption: 40W ●Overall Dimensions (W x H x D): 444 x 111 x 334mm ●Weight: 11.8kg

Stereo Power Amplifier
AP-701

Dual mono power amplifier with two custom-design Ncore modules. Independent left/right high-capacity toroidal core power supply transformers, discrete buffer amplifiers and two Ncore modules provide a complete dual mono structure from input to output, while the fully-balanced input stage and bi-amp mode allows you system expansion that only separate components can achieve. A DC12V trigger lets the AP-701 to turn on/off from the matching UD-701N.

- Max Output Power: 260W+260W (4ohms 1kHz), 170W+170W (8ohms 1kHz) ●Rated Output Power: 230W+230W (4ohms 1kHz), 125W+125W (8ohms 1kHz) ●THD: 0.003% ●S/N Ratio: 110dB ●Frequency Response: 10Hz to 50kHz ●Analog Inputs: XLR Balanced, RCA Unbalanced ●Power Consumption: 210W ●Overall Dimensions (W x H x D): 444 x 111.3 x 348.2mm ●Weight: 9.9kg

Network App

Everything you need to play Hi-Res music is in your hand

The TEAC HR Streamer is an all-new music playback app exclusively designed for next generation network player, the NR-7CD and the NT-505. A list of album artwork helps you to choose a music at-a-glance, wherever the music file is stored in your iPad or on NAS music server.

- Supported Devices: iPhone, iPad, iPod touch ●Supported OS: (please check with App Store and Google Play) ●Supported Product: NR-7CD, NT-505 ●System Requirements: Wireless LAN

Benefits of Bluetooth® Turntables

If you don't have (or don't like to install) a full-scale hi-fi system in your room, even our Bluetooth® turntables allow you to enjoy record playing with your Bluetooth® wireless speakers/headphones, making your system simple and easy.

No complicated wiring nor extra hi-fi units are necessary. Simply, press the "PARING" button to connect TEAC's Bluetooth® turntable with your Bluetooth® speakers/headphones which you might already have for your iPod/iPhone or Android phone.

Another beauty of Bluetooth® turntables is, as long as the speakers/headphones are located in its range, you can install the turntable anywhere in the room. Once you find a space for the turntable which requires pretty large footprint particularly in its depth, you don't have to worry about length of cable or ungraceful cable arrangements.

Driving your speakers better

The AP-505 is a capable power amplifier unit that supports both Bi-amp and BTL (bridge) modes, on top of conventional Stereo mode.

A conventional way of connecting speakers using one amplifier and a pair of speakers. Each speaker terminal on the amplifier is connected to a corresponding terminal on the speaker.

Deploying two AP-505 units, each AP-505 processes either Left or Right channel. The L-ch section on each amplifier processes lower frequency, as the R-ch does higher one. As a result, each tweeter and woofer unit is driven independently avoiding affect others.

Also known as "Bridge" connection. Deploying two AP-505 units, each AP-505 processes either Left or Right channel as a monaural power amplifier. As a result, entire output power of the amplifier is delivered to a single speaker, making your hi-fi system the most powerful among these configurations.
