Box with papers and a small logo.

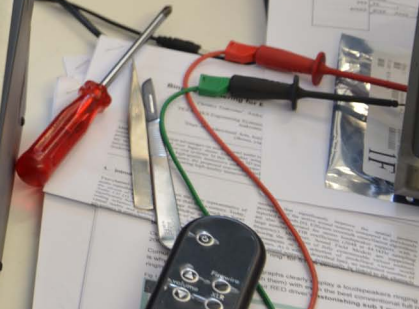

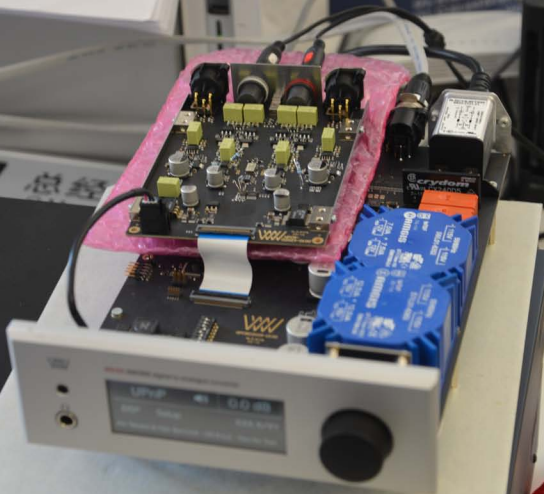

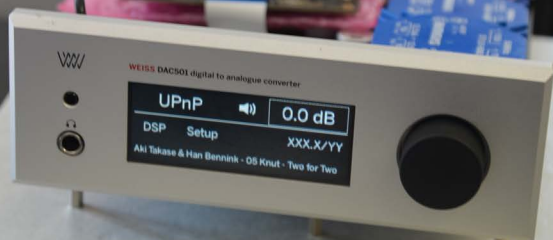

Table 8

Pin in the box that the 120V model
particular one feature in those that
setting edge. I found one that
with the 1.8, on wrong edge.
We should lower the 10 1.8, instead
made at the 120V. Data refer pins
reference for construction.

Pin	Color	Signal
1	Red	+
2	Green	-
3	Black	0V

Small white labels on the green cabinet drawers, likely containing inventory or identification information.

A collection of high-end audio components arranged on a stainless steel table. From left to right, the components are: a turntable, a tuner, an amplifier, a CD player, a DAC, and a power supply. A remote control is placed on top of the amplifier. Below the main table, a small white table holds a tuner and another remote control. The room has a window with a view of buildings outside and a radiator below it. The floor is carpeted, and sunlight is visible on the carpet.

A tall black rack holding a large stack of CDs. A small stack of CDs is also visible on the floor next to the rack.
