

Since its introduction 15 years ago, the Dan D'Agostino | Master Audio Systems Momentum series has been esteemed by industry professionals, reviewers, and music lovers as among the finest audio electronics in the world.

The Momentum S250 MxV Stereo Amplifier continues that tradition of uncompromising engineering:

- Re-engineered Power Supply: Built around an ultra-quiet 2,200 VA linear transformer with a winding scheme that slashes power and thermal loss by 90%, yielding a 50% improvement in output.
- Massive Reserve: Driven by a nearly 100,000 μF capacitor bank.
- Scalable Output: Delivers 250 watts/channel (8Ω), doubling to 500W (4Ω) and 1,000W (2Ω). "Thank you to our global community for 15 incredible years of supporting our pursuit of sonic perfection."
