

ARIES

Wireless Streaming Bridge

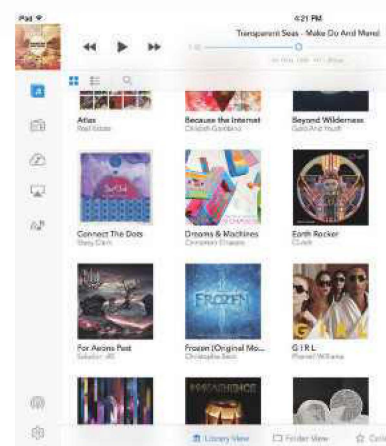

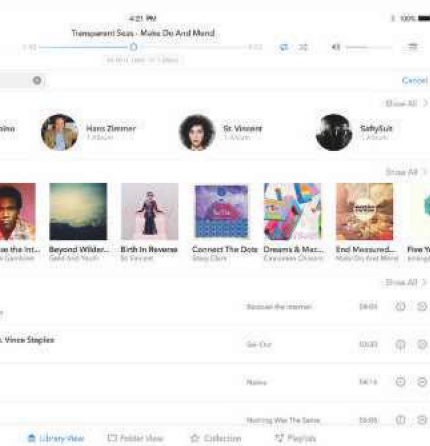

It is not a streamer, it turns your DAC into a streamer !

Streaming DSD and DXD Music Though WiFi Network

The ARIES serves as a "bridge" between music files on network storage or high quality online streaming services and your DAC — enabling DACs for the first time to stream high-resolution music quickly and wirelessly in virtually any sampling rate, including DSD, Double-Rate DSD and DXD. It is powered by AURALiC's proprietary Tesla hardware platform that includes a Quad-Core ARM Coretex-A9 processor running at 1GHz, 1GB DDR3 onboard memory and 4GB internal storage. The Tesla platform has a calculation ability of 25,000 MIPS, more than enough to decode a vast spectrum of audio formats, including AAC, AIFF, ALAC, APE, DIFF, DSF, FLAC, MP3, OGG, WAV, WV and WMA. ARIES as well as all other Lightning based products support several advanced functions such as on-device playlist that allows control software to turn off during play and complete supporting of multi-room, multiple control points.

LIGHTNING DS

Multi-Room Streaming Control Software

Seamless integration with online streaming from qobuz and TIDAL

Do not have a NAS[®] drive? Just plug your **USB Disk** and play!

No disk size limitation
Read all major partition formats
Drive USB HDD without external PSU
