DISC PLAYERS

GONDUL MK.II (LEVEL 1, 2, 3)

Gondul plays all standard formats; CD/SACD/DVD-Audio/DVD-video/MP3 etc.

This is the multi-channel version which outputs 5.1-7.1 channels. Its modular design allows the customer to choose his own plug-in boards and level of performance. Three different DAC modules provide different levels of performance, analogue input board to connect four analogue stereo sources, and a high end video board with video processing and both digital and analogue outputs.

Remote control included.

GONDUL M

Gondul M plays all standard formats; CD/SACD/DVD-Audio/MP3 etc.

The whole machine is optimized for state-of-the-art musical reproduction.

The optional analogue input board adds the full functionality of a pre amp with balanced and unbalanced inputs as well as a selection of digital inputs. Remote control included.

GONDUL M LE

Gondul M limited edition is our best performing CD/SACD player ever. With hand matched DA converters.

FREJA Mk.III

This is the new incarnation of the successful Freja Mk.III 2 channel disc-player that plays CD and SACD

formats. Cd drawer made of machined aluminium.

1 pair balanced outputs

2 pairs unbalanced outputs

1 set optical digital output

1 set RCA digital output

Remote control included.

SYN

New CD-player with many characteristics from its bigger sister. Excellent

entry level product for the aspiring music lover.

1 pair balanced outputs

1 pair unbalanced outputs

1 set optical digital output

1 set RCA digital output

Remote control included.

EMBLA

Bladelius Design Group is offering a totally new replay system. The Embla offer a silent playback system without any moving mechanical parts when

playing from the built-in flash memory. Read about Emblas features and technical specifications on our website!

POWER AMPLIFIERS

BEOWULF

Monaural amplifier.
Combination of bi-polar and MOSFET devices in one enclosure for bi-wired or bi-amplified speaker systems.
450W in 8 Ohms
900W in 4 Ohms
1800W in 2 Ohms

Basically, the Beowulf is two power amplifiers in one chassis. One amplifier section, based on bipolar power devices,

is optimized to handle low frequency information, while the other amplifier section, based on MOSFET power devices, is optimized to handle high frequency information.

YMER

The brand new Stereo amplifier Ymer is an offspring of the experience from the great Beowulf.
2x300W in 8 Ohms.
2x 2000VA transformers

Balanced design. Nextgen speaker terminals from WBT

BALDER

Stereo power amplifier
2x165W 8 Ohm <0.1% distortion

1800VA custom made, special core transformer
JFet Single-ended input stage
Balanced design from input to output
Speaker terminals are WBT

NJORD

Stereo power amplifier
2x100W 8 Ohm <0.1% distortion

Toroidal transformer 650VA
Speaker terminals from WBT

PHONO STAGE

HEIMDAL

This new, state-of-the-art, phono stage brings a whole new perspective to your vinyl collection. Heimdal is a fully balanced design from the input for the phono cartridge to the output.

PREAMPLIFIERS

SAGA

This is the new, high end, two channel preamp. It has extremely transparent sound.

3 pairs balanced inputs (XLR)
6 pairs single-ended inputs (RCA)
2 pairs balanced outputs (XLR)
2 pairs single-ended outputs (RCA) + tape out
2 toroidal transformers 500 VA each

IDUN

This is the refined version of the Thor preamp.

Machined Remote control included.

Inputs: 2 balanced
5 unbalanced
1 tape in
Output: 1 balanced
1 unbalanced
1 tape out

SIGYN

An entry level preamp-fier, a lot of effort has been

put into shortening all signal paths. Remote control included.

Inputs: 1 balanced
3 unbalanced
1 tape in
Output: 1 balanced
1 unbalanced
1 tape out

INTEGRATED AMPLIFIERS

THOR MK.II

The single ended input-stage drives 16 high power matched

output devices to provide 165 watts per channel into 8 Ohms.

Single-ended coupled input stage.
Stereo power amplifier
2x165W in 8 Ohms <0.1% distortion
Toroidal transformer 1800VA
Speaker terminals from WBT
Machined Remote control included.

Inputs: 1 balanced
5 unbalanced
1 tape in
Output: 1 balanced
1 unbalanced
1 tape out
Speaker terminals: WBT

TYR

Designed with minimum features but with the ability to reproduce music

faithfully to the composer's intentions is achieved.

2x100W in 8 Ohms.
J-FET Single-ended input stage.
Toroidal transformer 650VA
Remote control included.

Inputs: 1 balanced
3 unbalanced
1 tape in
Output: 1 tape out
1 preamp out
Speaker terminals: WBT
