

MIMER

The new media player

First glance at Mimer and you can anticipate what you are about to hear and envisage the great possibilities in front of you.

Mimer being true to Nordic mythology "those who drank from Mimers well could see and hear all that had happened and all that will happen".

Mimer is our latest in up market down scaled design. Captured within a timeless minimalistic format, we have paid focus on incorporating aesthetics with typical outstanding Bladelius high performance which has helped guide us to create this platform of unparalleled design, power and overall world leading excellence.

Initially the design focus of Mimer was intended for wall hung installation, naturally Mimer also allows you to easily stand mount for esthetic counter top installation without compromising design, form and performance.

Not to be reckoned with, Mimers supports formats of up to 32bit/384khz, & accommodates for streaming from NAS and USB devises, as well as Wimp and Spotify.

Mimer incorporates a generously large high resolution touch screen with four digital inputs, one analogue input and high performance analogue Pre- amplifier.
