

SAGA

STEREO INTEGRATED AMPLIFIER

Bladelius Saga is new High End integrated amplifier from Swedish Micke Bladelius, that offers high-end analog audio paired with a hybrid rose, Class D and Class A. Class A stage monitors Class D stage for the best possible sound. The result is a very open and dynamic sound with tremendous force. When one thought that the dynamics could not be better so come Saga in.

Amplifier that plays very big and have extremely fine control that You can not believe until you hear it. Soundstage is also very impressive and large with plenty of air and details. An amplifier one could easily live with for the final step?

Meticulously routed PCBs, minimal intrusion of components of high quality and short signal paths has resulted in an extremely transparent sound. User have 2 different input options "Amplifier A and B". Amp B is single ended mode and Amp A is in push-pull mode.

Preout 1 and 2 are completely separated with separate buffering for each channel. The design is fully balanced.

All components are hand selected and matched for the best sound. The software makes it possible to adjust all inputs to the same level and it is also possible to name all the inputs.

Mjolner remote included.

Specifications	SAGA Integrated
Design	Fully balanced
Output	2 x 450W 8Ω 2 x 800W 4Ω Class A & D
Inputs	3 pairs balanced 6 pairs single-ended
Outputs	2 pairs balanced 2 pairs single-ended 1 tape out 1 pair of speaker terminals
