GRAMMY

der unbekannteren Ausstattung werden Personen und Unternehmen gelobt, die einen schätzbaren Beitrag zur Weiterentwicklung der Technik im Bereich Ton- Aufzeichnung und Musikproduktion geleistet haben.

Die diesjährigen Preisträger - Dr. Harvey Fletcher und die Firma SRI - belohnen sich besonders für den gemeinsamen Gewinn der vorherigen Preisträger des Technical Grammy Award in better Gesellschaft.

SRI wurde 1942 von William S. Rice in Berlin gegründet und stellt ursprünglich professionelle Messvorrichtungen und Messgeräte für Akustik, Temperatur und Vibration und von 1950s High-End Audio-Equipment her.

Im Jahr 1957 wurde das Unternehmen einer weltweiten Durchbruch mit der SRI 140 (Messinstrument) - dem weltweit ersten „modularen“ Mess-Instrument, welches eine absolute Referenz ohne einen separaten Referenz-Sound möglich machte.

English source materials and commercial interface than acoustic chambers.

With the album introduction, the sound of popular music changed drastically as evident in English recordings made at Abbey Road by the Beatles and Pink Floyd, as well as RIAA Victor recordings by Frank Sinatra and many others.

SRI was the origin of the SRI 140 (Measurement Instrument), which was the first modular measurement instrument and was used in other SRI products.

SRI's products are used in professional audio, and SRI's products are used in other SRI products.
