Adapter 928/912

## 1. Adapter 928/912

This new adapter allows us to mount an EMT 912 as a second tonearm on the EMT 928 turntable. A rotatable arm-base is integrated into the adapter, so it can be configured for

- a) mounting distance 297mm: for EMT 912 HI-, EMT- or INT-version
- b) mounting distance 315,9mm for EMT 912 X version.

The adapter features an RCA outlet and is mountable to any EMT 928 II with no modifications.
