

EMT Step Up Transformer

STX 5/10

The EMT MC step-up transformer has been carefully designed and manufactured in Switzerland to satisfy highest demands for musicality. It is perfectly matched to EMT cartridges as a reference and offers a second output for cartridges with lower output level.

The toroidal winding technology with purest silver wire and advanced magnetic materials bring this very traditional technology to a new level of ultra-low noise and high resolution.

EMT was founded in 1940 and became famous by manufacturing professional turntables in Lahr, Germany. In 1965, EMT launched the famous MC cartridge TSD 15, which was produced in many ten-thousand pieces and used in broadcast studios all over the world.

In 1974, the portfolio was widened for hi-fi listeners and in 2006, the JSD series was introduced. Since 2014, all EMT cartridges are designed and manufactured in Switzerland.

We at EMT are enthusiastic about music reproduction and we feel sure that analogue technology harmonizes best with the nature of music.

All pickups are built piece by piece in fine craftsmanship by our well educated team of watchmakers and assembling employees. Even if we are familiar with most modern designing and manufacturing equipment, personal experience in listening and manual skills are the real reason making our cartridges so precious and musical.

Specification	STX 5/10
Gain:	+14 dB (1:5) +20 dB (1:10)
Wire:	99,99% Silver
Core:	Very low loss alloy
Ground options:	Input Cold Floating Center Tap
Load options:	EMT Open
Size:	200x160x80mm
