> Phono Stages

Black Cube

The Black Cube phono stage has gained cult status among vinyl oriented music lovers since it has hit the market in 1995. Countless positive reviews and awards and an absolutely unique customer satisfaction worldwide document this truly exceptional success.

PWX

The PWX power supply upgrades every Black Cube standard to a Black Cube SE. Neutrik plug and modification manual are supplied. (qualified soldering needed).

Black Cube SE

The Black Cube SE is equipped with the PWX power supply giving huge benefits sonically: much more bass authority, a more liquid midrange as well as more openness. These sonic benefits are without any doubt the reasons that more and more music lovers choose the Black Cube SE right from the start.

Black Cube Twin

The true analog fan with two turntables or two tone arms can save serious money. The Black Cube Twin delivers the same performance as two single Black Cubes SE at a considerably lower price. The unit comes with one PWX power supply and can be equipped with a second PWX on demand.

Black Cube Decade available End of Oct. 2005

The Black Cube Decade is the definitive High End phono stage for the ambitious audiophile listener and consists of two sections, each the size of the Black Cube Linear. Passive RIAA equalisation meets zero global feedback Class A output stage. Front accessible gain switches and soft bass rolloff. Impedance switches underneath.

PWX II available End of Oct. 2005

The PWX II power supply for Black Cube Decade is also available separately. Outlets for two audio sections.

Silver Cube

Sometimes dreams come true. **Lehmannaudio** phono stage have gained a legendary reputation for their sound and build quality. The Silver Cube has gained reference status in several hifi magazines and an overwhelming recognition as belonging to the ultimate in phono stage design.

> *Line Stages, Power Amplifier*
