ESOTERIC

We are happy to announce that the Esoteric N-03T is finally & officially Roon certified!

Roon is a more commonly used platform by audio enthusiasts nowadays, which means the N-03T got an extra very strong USP. The Esoteric N-03T is added to the Roon partner page, and the information and firmware can be found on the Global Esoteric website:

Next model in line is the Esoteric N-01XD. We expect this certification a lot quicker as hardware and software are already tested at Roon, and a large part is equal to the N-03T.
