A four-tiered white shelving unit is the central focus. The top tier holds a black rectangular component, possibly a tuner or amplifier, with a small white label. The second tier holds another black component. The third tier holds a black component with a digital display. The bottom tier holds a wooden board with two lit candles, providing a warm glow. The unit is positioned in front of a white backdrop.

A tall, thin black speaker is mounted on a black stand. The top section of the speaker is a light-colored wood. A small white label is attached to the top of the speaker. The speaker is positioned to the right of the shelving unit.
