- **All models feature easily removed exchangeable side panels.** This makes it possible to offer different finishes with the same base cabinet, keeping costs down, keeping customer/brand loyalty and offering a real “value for money” product.

Exceptional imaging and wide sound stage. Good bass extension, “classic” British midrange, excellent top end. **The “British” sound.**

- **Designed by Graeme Bridges (ex-ProAc) and Hand Built in Britain by Falcon Acoustics**
- **Highly competitive price points**

HISTORY OF RAM

The RAM by FALCON ACOUSTICS range offers a top-class listening experience and really good value at a market-leading cost. Designed and built in Great Britain.

RAM is a long-established British Brand started in early 1974 in Norwich near to Falcon. RAM speakers have always been highly regarded for accurate imaging, musicality, good solid cabinets and excellent value. Malcolm Jones from Falcon and Vince Jennings from RAM worked closely together on speaker development, Falcon supplied RAM with all its crossovers and some of the drive units that were used, and was also actively involved in the prototyping and production of the RAM LS3/5a. Falcon Acoustics bought RAM in 2011.
