Mirror 62

Soundintegration via wall mirror Invisible stereo with voluminous sound quality

Brilon | 17.06.2011

Having launched successfully the innovative soundboard Hohorizontal 51, the German company **finite elemente** now introduces the sound mirror **Mirror 62**, thus setting new standards in the integration of sound.

When you first experience Mirror 62, you can't actually tell where the music is coming from. So it's all the more surprising when you discover that there is a complete music system concealed behind the mirror. Excellent sound. Absolutely minimalist design.

The core of the Mirror 62 is based on the audio technology of the Hohorizontal 51 and is optimised for flat-surface wall mounting. The result is an amazingly powerful and voluminous sound. Emanating from a concealed source in the room.

Music is supplied to the Mirror 62 from iPods®, iPhones® and other devices via Bluetooth. The perfect sound system for your home, even in portrait format. Whether living room, dressing room, bathroom or study. Available in three different sizes– in black, white or silver or even without frame.

Retail price: from 1.448 EUR

Available in specialized furniture shops.

Delivery time: approx. 8 weeks.

Music is my first love

Music has always been an experience for the senses, the expression of freedom and a way of life. At **finite elemente**, all our experience is used to achieve the goal of bringing this quality into an artistic yet scientifically founded design that does not confine the music to any limitations. It illuminates the spectrum of this purely human form of expression down to the last detail of its entire power and passion.
