

Haydn Grand Special Edition

In celebration of this special year of Haydn we are happy to introduce our newest creation, the Haydn Grand Special Edition. This new member of the Concert Grand Series honors the significance of Josef Haydn's contribution to Western art music as the numerous performances of his beautiful compositions are being presented throughout all of Austria this year.

The first and most obvious difference with this limited edition loudspeaker is its hand selected, "classic" walnut veneer. This is the first time we have offered a walnut loudspeaker, because we believe this is the most appropriate finish for a product that represents the foundation of our musical heritage.

As with all of our other products, performance quality is first. In order to increase the quality of our already superlative Haydn Grand, we focused on developing new technologies.

As is immediately apparent when the grill is removed, we have developed an entirely new patented 6" Spider-Cone™ woofer. In addition to the improved dynamics this new driver represents, we have also made critical adjustments to the cross-over to further extend performance quality.

With the improvements in performance and the beautiful specially selected walnut finish, this model also has a limited production cycle of only 500 pairs worldwide. Starting with the pair shown in this literature of 001, there will be only 499 additional pairs being produced. The special edition features a new rear panel depicting the specialty of this limited edition model as well as a reproduction of Josef Haydn's signature on the grill. Also included with this Limited Edition loudspeaker system is a CD containing a special selection of Josef Haydn's music.

Happy listening!

A stylized, handwritten signature of Joseph Haydn in black ink.

Technical Information

Impedance	4Ohm
Frequency Response	40 - 20kHz
Sensitivity	88.5dB
Recommended Amplifier	50 – 180Watts
6" Midrange/Bass Driver	X3P Spider-Cone™ 1" Dome-Tweeter Hand-coated, triple-neodymium magnet, VA Silk Dome
Bass System	Front-Vented Bass Reflex
Bass Function	Impulse Optimizing QB 3 (Quasi-Butterworth)
Crossover Function	1% Tolerance MKP Capacitors Exclusively Air Coils at 0.7% tolerance 1% Tolerance Metal Film Resistors Inductance Free
Crossover Function	2-way, 6 dB and 12 dB Bessel
Dimension (W x H x D)	174mm x 361mm x 265mm 6.85" x 14.2" x 10.4"
Weight per Pair	20kg / 44lbs

Haydn Grand Special Edition CD Description

The CD selected to accompany this limited edition loudspeaker is itself quite special. The recording is from 1990 by one of the pioneering authentic instrument ensembles, the Cencentus musicus Wien. This group is lead by Nikolaus Harnoncourt and was founded in 1953 made up of musicians from specifically from the Vienna Symphony and has matured into the highest regarded ensembles specializing in historical performances.

The musical works contained on this CD are begun with the festive Symphony No. 30 dated from early 1765. It is said that this symphony can only be properly appreciated when performed in this authentic and historically correct instrumentation. In addition to the famed Symphony No. 30 included on this CD are the Symphonies No. 53 and No. 69 dating 1774 and 1776 respectively.

Enjoy!
