

PRESS RELEASE

**The new IsoTek 'EVO3Venus' AV power centre:
the affordable way to enhance and protect any hi-fi
or home cinema system**

IsoTek, leader in mains conditioning systems for hi-fi and home cinema, extends its sentry level 'Discovery' range to provide yet another impressively cost-effective and elegantly styled way to optimize the performance of valuable equipment.

Want a cost-effective way to increase your return on investment in high-end hi-fi or home cinema systems? Looking to improve your system's performance and enhance its lifespan? Then you probably need to clean up your power.

Mains electricity is distorted by, and gathers noise from, a variety of influencing factors which constrain the performance of electronic equipment. The likelihood of polluted mains supply is now greater than ever thanks to our widespread use of computers and wireless networks. What's more, power surges or spikes can pose a real risk to valuable gear, potentially causing internal damage or reducing a component's lifespan.

The answer? Power conditioning. IsoTek offers a comprehensive range of multi award-winning solutions designed to deliver clean, filtered power while also providing protection from surges or spikes. It's 'Discovery' range offers impressive performance at entry-level prices, delivering exceptional value for money.

New to the range, the EVO3 Venus AV power centre is a five-outlet mains conditioner designed to enhance and protect a complete audio or AV system. Elegantly designed, it will complement even the most stylish system setup.

A painstakingly designed delta filter topology filters out common mode and differential mode noise, with a reduction in RFI of 30dB. Each of the five outlets is independently isolated to prevent cross-contamination. In addition, IsoTek's unique sequential and repeatable protection system provides 13,500A of instantaneous protection from electrical spikes and surges, safeguarding valuable equipment.

Unlike many entry level mains filtration products which use off-the-shelf components, the EVO3 Venus is designed from the ground up by IsoTek. Top-quality parts are used throughout, including a hand-soldered, silver-plated PCB, and internal wiring with silver-coated OFC (oxygen-free copper) conductors and a Teflon PTFE dielectric.

Sonic improvements delivered by the EVO3 Venus include greater clarity and definition, a lowering of the noise floor leading to improved dynamic range and enhanced spatial qualities, as well as a refinement and a general opening up of the soundstage.

With robust steel casework beautifully finished in white, and a price tag of only £325, the EVO3 Venus will protect and enhance the performance of every connected component – leaving you free to enjoy the full level of sound and picture quality that your system is capable of.

IsoTek Venus key features

- Removes common mode and differential mode mains noise.
- RFI reduction 30dB.
- Independent outlets prevent differential mode crosscontamination.
- Unique delta filter topology improves product performance.
- Internal wiring: multistrand silverplated OFC copper with PTFE dielectric.
- Maximum continues power 2,300W.
- 13,500A of instantaneous protection, featuring IsoTek's unique sequential protection system.
- Available with UK, EU, US, AU and CH sockets.

Technical specifications

Number of outlets	5
Type of outlets	UK, EU, US, CH, AU
Standard mains inlet	10A IEC fused
Mains voltage	100-240VA 50-60Hz
Maximum current	10A HRC
Total wattage	2,300W (UK, EU, CH, AU) 1,100W (US)
Dimensions (mm)	160 (width) x 45 (height) x 225 (length)
Weight	1.5 kg

Pricing and availability

The EVO3 Venus is available now in a stylish white finish.
Priced at £325.

About IsoTek

Hampshire based IsoTek is the world's leading brand of specialised power optimisation products for hi-fi and home cinema use.

Mains electricity is distorted by, and gathers noise from, a variety of influencing factors which constrain the performance of electronic components. For more than a decade, IsoTek has produced standard-setting solutions designed to filter and distribute the mains supply and deliver pure, refined power that optimises and protects valuable audio and audiovisual systems. Its product range features performance-enhancing power conditioners focused on the specific requirements of individual systems, plus a series of high-performance mains cables and connectors.

IsoTek products are enjoyed by more than 50,000 customers in 45 countries, and have earned numerous accolades from specialist audio and AV publications worldwide. A number of third-party manufacturers use IsoTek products for development and/or demonstration purposes, including Arcam, Denon, Genesis, Marantz, Monitor Audio, Nordost, Onkyo, Pioneer, PMC, Primare, Roksan and TEAC Esoteric. All IsoTek products are designed for purpose, manufactured in Europe and built to last.
