Isotek® EV03 PREMIER

Isotek is a world affordable power cable made in
Germany Germany to improve the final results.
A. Power Cables Silver Plated 99.99% conductivity
B. Shielded cables with aluminum braiding
C. Nylon PBT insulation
D. High performance cables with high strength
E. Low loss
F. Low impedance through cable transitions
G. Low loss
H. Low impedance cables or suitable as well as
intermediate cables
I. Low loss
J. High speed high speed 100% conductivity

Isotek® EV03 VENUS

The award winning Premier EV03 has been recognized to offer a highly effective
line spike protection. As an effective way to provide clean power with better
audio and video results, Isotek EV03 provides a high quality, surge protection in
a discrete form factor.

- Superior Low Loss and Superior High Speed Cable
- 100% Shielding
- Superior Cable and Silver Plated 99.99% conductivity
- 100% Shielded cables with aluminum braiding
- Superior Nylon PBT insulation
- High performance cables with high strength
- Low loss
- Low impedance cables or suitable as well as intermediate cables
- High speed high speed 100% conductivity

isoTek® | EVO3 SIGMAS

The EVO3 Sigmas offers 4 medium power outlets, now rated at 10A and 2 high current driven by a paired down version of Titan's Direct-Coupled® conditioning network. It represents an extremely cost effective full system upgrade.

- Removes both Common Mode and Differential Mode transients.
- THF reduction (70dB)
- The unique conditioning stages ensure optimal isolation between all outlets. Two high current outlets incorporate part of Titan's Direct-Coupled® circuit. Four outlets feature IsoTek unique Adaptive Gating® circuit, which auto-removes the load.
- LED Display showing voltage and THD distortion of the mains.
- HERFD Kirchhoff's Equal Resistance Path® ensures equal resistance and equal power delivery across all outlets.
- 10L/2000A of instantaneous protection.
- Internal wiring, solid core silver plated PCBCC with FEP virtually an air dielectric.
- Two high current outlets delivering 3.200A continuous. Four medium current outlets, delivering 2.200A continuous.
- Available with UK, EU, US, Australian, Swiss and South African outlets.

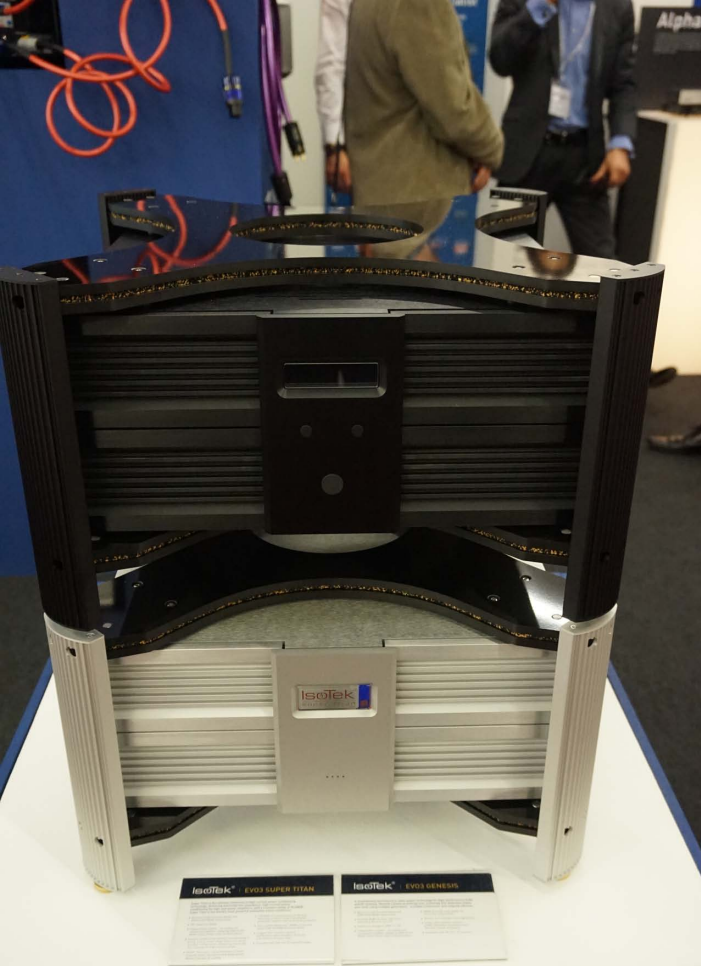

isotek® | EV03 TITAN

The new EV03 Titan is a progression of IsoTek's original multi-award winning design. Whilst utilising the unique Direct Connect® technology, the circuit has been radically updated. EV03 Titan offers the ultimate high current/power conditioner in the smallest form factor.

- Operates both Constant Mode and Differential Mode, meets most class 100 frequency range.
- 50% better for EMI/RFI class standard.
- Unique zero-voltage commutating network in a series parallel configuration, that delivers substantially low impedance and high current tolerance for maximum of 20% (1000V) current surge and 600% (1000V) current surge compared to the original IsoTek Titan, 50% of the size.
- Super Titan contains re-engineered for 200A.
- All ISO Tek Direct Connect® Filter Modules meet international and local safety standards for use in cabinets.
- 112 500VA of instantaneous production, featuring IsoTek's unique operational protection features with active fault protection.
- Integral wiring, solid state active power, PFC/CEC, active EIP, safety for air discharge.
- Two independent output sections, 4-stage, continuous power with 20,000V transient ability (single event rating).
- Available with CE, ENEC, Australian, TUV and South Africa cables.

IsoTek® EV03 SUPER TITAN

EV03 SUPER TITAN is a high-end power supply unit designed for high-performance computing and server applications. It features a 1000W power output, 80+ Titanium efficiency, and a fully modular design. The unit is housed in a robust, industrial-grade chassis with a curved front panel and a central IsoTek logo. It is designed to provide stable, clean power to demanding workloads, ensuring optimal system performance and reliability.

IsoTek® EV03 GENESIS

EV03 GENESIS is a high-end power supply unit designed for high-performance computing and server applications. It features a 1000W power output, 80+ Titanium efficiency, and a fully modular design. The unit is housed in a robust, industrial-grade chassis with a curved front panel and a central IsoTek logo. It is designed to provide stable, clean power to demanding workloads, ensuring optimal system performance and reliability.
