

the **ONE** way to upgrade all audio components!

GENESIS ONE

Features & Benefits:

- Targeted upgrade of critical electronics in a system
- Full mains sine wave generation dramatically upgrades all source components
- 100W of totally clean power for all front-end components.
- Compact design running in Class D, with high-quality linear power supply
- Link multiple units together, so only one wall outlet is needed
- Available with and without a display (order without display and save approx 25%).
- Available in black and silver finish
- EVO3 Premier Power cable included
- Available in UK, EU, US, Australian, Swiss and South African outlets

“The ultimate clean power system for individual front end components. Pure mains sine wave generation in a single cell. Combine six units side by side to make a standard rack width component or combine Titan One and Genesis One using a link cable for the ultimate bespoke power cleaning solution!”
