

JORMA · PRESS RELEASE

Jorma introduces Statement Encore and Origo Encore at High End Vienna 2026

Refined evolution of acclaimed cable series brings flagship architecture to the broader range

Jorma will preview Statement Encore and Origo Encore at High End Vienna, 4–7 June 2026. The two new series represent a refined evolution of their predecessors, carrying forward proven architecture with enhanced construction and materials.

Statement Encore sits below the flagship Paragon, bringing that cable's refined engineering to serious systems. Built with eleven cryogenically treated conductors and finished in walnut, Statement Encore carries music without colouring it — neutral, detailed, and true to source.

Origo Encore builds on the lineage of the original Statement, offering the same exacting specifications with refined materials and finish. Completed in oak, it delivers the same sonic character: neutral, uncoloured, and transparent.

Both series are available as loudspeaker cable, interconnect, and power cable, and will be available from June 2026. Full pricing details to follow.

"I have spent years refining what the Paragon is. With Encore, I wanted to understand how far that thinking could reach. These cables carry the same convictions — just further down the range."

Leif Olofsson, Chief Designer, Jorma

At High End Vienna, Jorma cables will be present across the following rooms:

JORMA and MARTEN

Level 1, Room 1.32

Jorma Statement Encore, Jorma Origo Encore, Jorma USB Reference, Jorma Ethernet Reference, Jorma Power Reference
