

# TRINITY SERIES AND STATEMENT POWER

**MAY 2018**

We are proud to add the Trinity series to the Jorma Design suite of award-winning cables.

Using the same technology as Statement and Duality, this replaces the No.3 series with improved materials and performance, at a fraction of the cost.

For the first time ever, we have created a power chord for Statement - simply called Statement Power. It features improved inductors and shielding. Using Furutech NCF technology, we have created our ultimate power chord.
