

Kimber Announces New Kimber Select KS2400 Line of USB Cabl

USB Audio has emerged as a premier source for all listeners. The KS-2400 series has broken the mold for mass produced machine built cables. Each is handcrafted using our artisan approach to lift the veil that has been separating you from your digital music. The lower noise floor and increased dynamics across the entire tonal range will deliver a sense of realism that you never knew existed.

Features

- VariStrand power conductors
- Solid core signal conductors
- Braided geometry
- Dual layer frequency optimized shielding
- Handcrafted in Ogden, Utah USA
