

Better connectors are the lever that push Ascent power cables to the next performance plateau. Power cords are the foundation of overall system performance. PK14's 14 AWG / 2.08mm² pure copper conductors are rated to exceed the typical 15amp outlet rating. Current delivery is only part of the equation. We also utilize neutral colored, virgin dielectric materials to ensure and maintain conductor purity. Great materials coupled with Wattgate Audio Grade evolution series connectors combine to deliver a more robust and more reliable power cord to serve all your sources.
