

# B BUS Ag

Metallurgy, geometry, dielectric & termination methods can vary greatly in USB cables and will affect sound. Silver signal conductors and silver plated power conductors and shielding increase cable bandwidth. This will always result in more accurate sound.

**Connector Options**

USB Type A

USB Type B

## Features

### B BUS Ag

- Pure silver signal conductors.
- 6.1% silver-plated copper conductors.
- 6.1% silver-plated drain and shield wire.
- High-density polyethylene signal conductor dielectric.
