

12VS consists of twelve gray and twelve black conductors, arranged in a large format braid. The conductors feature VariStrand conductor geometry and are drawn from Ultra-pure copper. The aggregate wire size is two 8 awg conductors. The 50% increase in conductor mass makes 12VS the perfect choice for internal biwire applications and high current amplifiers.

Features

- PE dielectric
- VariStrand copper conductors
- 24 wire braid (12 conductors per polarity)
- 8 awg per polarity
- 0.75" (19mm) outside diameter
- Internal biwire available
- Handcrafted in Ogden, Utah USA
