

# 光悦 Koetsu

## Black Goldline

For many, the Koetsu Journey starts with the Black Goldline. Its Warm and full bodied sound makes it an excellent choice for all genres of music.

*"From the clarinets in the opening to the deeply textured final chord of the first movement, the Koetsu's performance was impossible to ignore: This wasn't just pretty sound in place of the music but sound as a part of the music."*

Art Dudley, Stereophile

Specifications :

- Anodized Aluminum Body
- Copper Coil Wiring
- Samarium Cobalt Magnet
- Boron Cantilever
- 0.4 mV Output
- 10.8 g Net Weight
- Recommended Tracking Force 1.8-2.0g
- Recommended Load 80-1,000 ohms
