

光悦 Koetsu

Rosewood Signature Platinum

The Koetsu Rosewood is a cornerstone of high-performance analog playback history. By carefully selecting ultra high purity materials and aging parts to perform optimally, Sugano-san formed a cartridge that recreates real breathing music extracted from the grooves of your record collection. The Koetsu Rosewood Signature Platinum features rare platinum magnets and silverplated 6N copper coils usually reserved for Koetsu's stone body cartridges. It's the perfect choice for those lusting after a stone model but require a cartridge with less mass or simply prefer the look of rosewood.

"I'd never before had the sense so strongly that I was actually hearing the mike feed. It was truly amazing; I felt like I was right there." Jonathan Scull, Stereophile Magazine November 1998.

Specifications :

- Natural Rosewood Body
- Copper Coil Wiring
- Samarium Cobalt Magnet
- Boron Cantilever
- 0.4 mV Output
- 8.9 g Net Weight
- Recommended Tracking Force 1.8-2.0g
- Recommended Load 80-1,000 ohms
