MAGICO SPOD

Magico, LLC the **Leader in High Performance Loudspeaker Design and Manufacture**, is pleased to announce a newly developed spiked footer solution called the SPOD.

The SPOD is based on the scientific design principles of Constrained Layer Damping (CLD) and provides an effective way to couple Q-Series, S-Series (MkI / MkII) and V-Series loudspeakers to the floor while dissipating unwanted mechanical energy away from the enclosure. Demonstrable results include increased dynamics, enhanced focus, greater resolution, and a closer representation of the original musical performance as it was intended during the recording process.

The main structure of the SPOD is formed from multiple machined aluminum sections which when assembled form a vertical stack. A solid pure copper substrate center round is sandwiched by a top and bottom layer of aluminum that when compressed together facilitates the Constrained Layer Damping (CLD) function. An adjustable spiked footer threads into the SPOD base and when locked into position provides solid coupling to the floor.

Magico SPOD

SPOD 8	SRP \$ 2,995 Direct installation on S1Mk II, S3Mk II, S5Mk II, V2, V3, Q1, Q3, Q5
SPOD 8 <i>plus</i>	SRP \$ 3,195 Direct installation on S1, S3 w/ new outrigger supplied with SPOD
SPOD 6	SRP \$ 2,245 Direct installation on S5

The SPOD is available for immediate shipping.

Magico was created over a decade ago for the sole purpose of leading a no holds-barred assault on what is possible in contemporary loudspeaker design. Inspired by the unique vision of Industrial designer and accomplished musician Alon Wolf, every Magico product is designed against the true standard of perfect audio reproduction – live music. At Magico, we strive to lead in the creation, development, and manufacture of the most elegant and technologically advanced loudspeaker systems in the world. Each product expresses our passion to craft uncompromising devices that reveal the music as never before.
