

WORLD PREMIERE AT CES 2013

POWER & PERFORMANCE WITH PERSONALITY

Django L

The Django L is the smaller version of last year's hugely successful Django XL. But it's no little brother. With power and performance to spare, it punches well above its weight. Its versatility outscores any speaker in its class. And the sleek, fresh design means it looks as good as it sounds.

Two way, with specially designed bass units from Norwegian SEAS and a ceramic tweeter from Accuton, the Django L is a real Marten speaker. Giving you the priceless sound reproduction you'd expect – at a price you might not.

For a chance to win a pair of Django L enter our competition at www.martencompetition.com

COLTRANE TENOR

Distinguished and refined, the Coltrane Tenor is the latest speaker in the renowned Coltrane series. Significantly more powerful than the original Coltrane, it still delivers the extreme clarity, speed and resolution that have made the Coltrane series' name.

Three way, it boasts newly developed bass drivers with innovative technology never before seen. The cabinets themselves are made with the most exclusive materials, in a sleek, beautiful design. Offering elegance, with a whole new level of excellence.

MADE IN SWEDEN

CES 2013

Marten will exhibit Coltrane Tenor in Venetian Suite 29-229. Sound Advice will exhibit Django L in Venetian suite 29-227.
