

MARTEN

NEW POWER FROM MARTEN CES 2011

Marten Coltrane 2

CES 2011 will be the world premiere for the new, extremely powerful Coltrane 2. The Coltrane 2 employs a newly-designed carbon fiber cabinet, two 11-inch ceramic sandwich woofers, a ceramic midrange driver, and a diamond tweeter, all newly developed together with Accuton.

The original Coltrane was the loudspeaker that gave Marten its worldwide reputation when it was shown at CES 2003. It received Product of the Year award in HiFi+ in 2004 and HP's Editor's Choice Award in The Absolute Sound in 2006, among other awards.

Marten Mono Power Amplifier

In our search for perfection, we came to the conclusion that we needed to create our own power amplifier. In a joint venture between Leif Olofsson, chief designer of Marten, and Patrik Boström, patentee of AMS, a new technique for creating powerful, yet distortion-free, transparent and musical sound was developed. AMS has been used for the first time in the Marten Mono Power Amplifier, which offers 600 watts into 8-Ohm loads, 1100 watts into 4-Ohm loads, and 1800 watts into 2-Ohm loads.

Join us for the unveiling of both products at CES 2011 and take the Marten tour.

THE MARTEN TOUR CES 2011

Marten, Venetian Room 30-130: Marten Coltrane 2 & Mono Power Amplifier

Engström & Engström, Venetian Room 29-128: Marten Coltrane 2

EAR USA, Venetian Room 30-112: Marten Heritage Getz

Holm Acoustics, Venetian Room 29-135: Marten Heritage Getz

Marten speakers will be shown in a few more rooms. Please get a leaflet in one of the rooms above or check for more information on our website.
