

More Mingus, than Mingus.

We are very happy to announce the release of Mingus Quintet 2. At a time of year when giving is practically a pastime, this is all the gift we need.

Mingus Quintet 2 benefits from all the design and build qualities that make the series so successful. With pure diamond, pure ceramic and aluminium sandwich drivers, the first order crossover has been tweaked for perfect balance.

The sound is open, clean and dynamic - with a deep and powerful bass presentation.

Now featuring solid wood tops and bottoms, the cabinet is stronger and more resonance-free. This is further enhanced by the use of advanced damping materials and [Marten Isolators](#). For full details, images and specifications visit www.marten.se

Kind regards

Marten
