

Models upgraded to Marten Isolator

We've had such good results with Marten Isolators that we are rolling them out further.

From 1st July we will be adding them to Coltrane 3, Coltrane Tenor 2 and Mingus Quintet. These have been precisely optimised for the weight of these models, so the performance is greatly improved.

This means, Coltrane, Mingus and Parker series will feature Marten Isolators as standard. We will also sell Marten Isolators separately, in 4 sizes for customers that want to upgrade Coltrane, Mingus, Heritage and Oscar models.
