Our journey started 25 years ago as a startup producer in a small town in Sweden. With a strong belief in our product, we worked tirelessly to show the high-end audio community what we had to offer. Our dedication has remained steadfast and has led to our most sophisticated product line to date, consisting of four series and twelve models. Our growth has always been consistent, and with recent expansion to two facilities in Gothenburg, it looks set to continue.

NEW

MINGUS
Septet pg 18

Mingus Septet is perfect for those that admire the power and performance of Mingus Orchestra, but also want a more lounge-friendly listening experience. With many similarities to its larger counterpart, Mingus Septet delivers the same high-level performance without compromise. Its full-range, deep bass and wide dynamics create an unparalleled sound that is both captivating and immersive.

COLTRANE Series

In 2003, Marten introduced its flagship Coltrane series; it received critical acclaim and helped establish the company as a significant player in high-end audio.

The Coltrane series has been at the forefront of innovation for Marten, premiering the use of Cell drivers and the first order crossover, which creates perfect time and phase coherence; flawless time coincidence has incredibly low distortion. The cabinets—made by skilled craftsmen in Sweden—are resonance neutral, built with carbon fibre and solid wood elements.

The Coltrane series is the ultimate reference in sound reproduction, with extreme clarity, speed and resolution; it's uncannily musical even at low volume.

COLTRANE Supreme 2

Coltrane Supreme 2 Mk2 is not only the most prestigious model in the Coltrane Series, but our entire product range. We wanted to create the ultimate speaker for the home - perhaps the best in the world.

We selected the very best materials to create our ultimate speaker model, so the sound is naturally very open and dynamic, with a soundstage that you won't believe until you hear it. Designed using our recording studio in Sweden as reference, the difference between reality and recorded sound is indistinguishable.

Coltrane Supreme 2 Mk2 has been a driving force behind Marten's design and technology innovations. It has helped us make significant breakthroughs in our product range and continues to be a leader in the market.

FEATURES

- 5-way
- Pure Diamond tweeter
- Accuton Cell drivers
- Carbon fibre cabinet
- First order crossover
- Jorma Statement cables
- Marten Isolators

See technical specifications for finishes

STATEMENT

Coltrane Supreme 2 Mk2 features Jorma Statement internal cables and our most advanced crossover with the highest quality components.

COLTRANE
Momento 2

Underneath the imposing form of Coltrane Momento 2 lies technology to rival Supreme 2. With enhanced full-picture sound, Coltrane Momento 2 delivers music that sounds just as it did the first time you heard it.

Momento 2 uses the bespoke crossover technique developed for Coltrane Supreme 2. The first order crossover makes for absolutely perfect time and phase coherence; and flawless time coincidence. Built with the finest materials, including pure diamond drivers, carbon fibre cabinets and Jorma wiring, the sound is crystal clear with full dynamics and deep, controlled bass. The soundstage is vivid, delivering performance as true to reality as possible.

FEATURES

- 4-way
- Pure Diamond tweeter
- Accuton Cell drivers
- Carbon fibre cabinet
- First order crossover
- Jorma cables
- Marten Isolators

See technical specifications for finishes

UPGRADE

Coltrane Momento 2 can be upgraded to Statement Edition, featuring Jorma Statement internal cables and higher quality crossover components.

COLTRANE Coltrane 3

The original Coltrane quickly became a classic when it was launched in 2003; the latest version continues to impress.

It has everything that makes a true Coltrane speaker: crystal clear high resolution sound; deep, controlled bass; resonance-free cabinet; specially selected premium materials. It has all the poise and power of its counterparts, in a lounge-friendly cabinet. Now with Marten Isolators, it has lower resonance and increased dynamic bass with greater power and control.

FEATURES

- 3-way bass reflex
- Pure Diamond tweeter
- Accuton Cell drivers
- Carbon fibre cabinet
- First order crossover
- Jorma cables
- Marten Isolators

See technical specifications for finishes

UPGRADE

Coltrane 3 can be upgraded to Statement Edition, featuring Jorma Statement internal cables and higher quality crossover components.

COLTRANE SERIES

COLTRANE Tenor 2

Coltrane Tenor 2 condenses all the knowledge from its older siblings into a sleeker, more compact design that is easy to place in a room.

Its ergonomic cabinets deliver the control and power you expect from a Coltrane: the sound is open and dynamic, with a sparkling clarity. The bass is full, rounded and exceptionally controlled. Marten Isolators greatly reduce resonance, enhancing its natural clarity and openness.

FEATURES

- 3-way bass reflex
- Pure Diamond tweeter
- Accuton Cell drivers
- Carbon fibre cabinet
- First order crossover
- Jorma cables
- Marten Isolators

See technical specifications for finishes

UPGRADE

Coltrane Tenor 2 can be upgraded to Statement Edition, featuring Jorma Statement internal cables and higher quality crossover components.

COLTRANE SERIES

MINGUS Series

The Mingus series is a prime example of how we implement trickle-down technology: a fundamental principle of our design philosophy. We leveraged our experience and expertise—particularly in the areas of crossover, driver handling, and resonance reduction—to produce a series that is keenly competitive, but lounge-friendly too.

With the addition of Mingus Septet in 2023, the series has brought together the design and technology that we have become known for in series to be reckoned with. The Mingus series delivers the clarity of pure diamond, powerful dynamic bass and faithful soundstage, with distortion-free and acoustically invisible cabinets.

MINGUS Orchestra

The crown jewel of the Mingus series, Mingus Orchestra, offers the strength and clarity of 51mm and 20mm Diamond drivers. Our current design and technology are seamlessly integrated into the elegant Mingus cabinet.

Mingus Orchestra employs our market-leading first order crossover. Combined with Cell drivers, this creates flawless time coincidence, as well as perfect time and phase coherence. The result is record-low distortion, delivering the most natural and dynamic sound.

Created using the finest components we could find, Mingus Orchestra is the ultimate expression of the series.

FEATURES

- 4-way bass reflex
- 51mm and 20mm Pure Diamond drivers
- Accuton Cell drivers
- First order crossover
- Carbon fibre cabinet
- Marten Isolators

See technical specifications for finishes

UPGRADE

Mingus Orchestra can be upgraded to Statement Edition, featuring Jorma Statement internal cables and higher quality crossover components.

MINGUS
Septet

MINGUS SERIES

MINGUS Septet

Mingus Septet is a heavy-weight four-way speaker that boasts seven drivers. Custom Marten pure diamond tweeters and beryllium high midrange drivers ensure every detail is captured with clarity and precision. Two active, and two passive bass drivers round out the lower frequencies with deep, full and controlled bass.

Our first-order crossover provides open, clean, and dynamic sound, while the advanced damping mats, wooden tops and bottoms, and aluminium plate ensure a neutral cabinet with superb resonance control. Marten Isolators further reduce resonance by separating the cabinet from the supporting surface.

FEATURES

- 4-way
- 1" Pure Diamond tweeter
- 3" Pure Beryllium high midrange
- First order crossover
- Jorma cables
- Marten Isolators

See technical specifications for finishes

UPGRADE

Mingus Septet can be upgraded to Statement Edition, featuring Jorma Statement internal cables and higher quality crossover components.

MINGUS Quintet 2

Mingus Quintet 2 has all the characteristics of a Marten speaker: full-range, with deep bass and wide dynamic range.

In its second generation, we improved resonance control two-fold. Extra damping and solid wood top and bottoms make the cabinet more neutral than before, with Marten Isolators further reducing resonance by separating the cabinet from the supporting surface.

The newly-designed crossover system powers an array of diamond, ceramic, and aluminium sandwich honeycomb drivers.

FEATURES

- 3-way bass reflex
- Pure Diamond tweeter
- Accuton Cell drivers
- First order crossover
- Jorma cables
- Marten Isolators

See technical specifications for finishes

UPGRADE

Mingus Quintet 2 can be upgraded to Statement Edition, featuring Jorma Statement internal cables and higher quality crossover components.

MARTEN Isolators

At Marten, we understand that reducing resonance is crucial to achieving exceptional sound quality. With Marten Isolators, we have taken this to a new level, isolating the speaker completely from the floor and delivering unparalleled soundstage clarity.

“The use of Marten Isolators has proved so successful that we have rolled them out across our entire product range.”

Leif Olofsson, Chief Designer

PROTECT YOUR SOUND

Distortion and resonance are two key factors that can impact the sound quality of even the most high-end speakers. While our precision materials and finely-tuned components go a long way in reducing these factors, the speaker's position on a supporting surface can create its own resonance issues, resulting in a muddy soundstage.

QUALITY AS STANDARD

To tackle this challenge, we partnered with audio isolation experts, IsoAcoustics, to create Marten Isolators. These innovative isolators work by preventing vibrations from travelling down to the floor, effectively isolating the speaker from the room. This ensures that the floor cannot resonate unwanted sound back up into the speaker, reducing resonance and distortion, and eliminating dissonant sounds in the listening area.

FEATURES

- Dynamic bass with increased power and control
- Natural openness and clarity
- Optimised for cabinet weight
- Resists lateral movement and oscillations
- Reduces internal reflections

PARKER Series

The Parker series was a step-change in product development. All drivers are custom-designed, allowing absolute control of the components. With improved construction materials and techniques, and Marten Isolators, the cabinet is almost resonance free.

The multi-diverse crossover technique allows these elements to work in perfect balance, so what you're left with is a crystal clear soundstage, full, deep bass and exceptional dynamics.

PARKER SERIES

PARKER Quintet

Parker Quintet is a 2.5-way floorstander that boasts nine custom drivers and internal cables from Jorma. We've gone to great lengths to ensure that this speaker is resonance-free, with improvements to the cabinet construction and the benefit of Marten Isolators. These features work together to eliminate unwanted vibrations and distortions, resulting in a powerful and controlled sound that faithfully reproduces the original recording.

FEATURES

- Multi-diverse crossover technique
- Passive radiators
- All custom drivers
- Jorma cables
- High sensitivity
- M-board multi-layered cabinet
- Marten Isolators

See technical specifications for finishes

UPGRADE

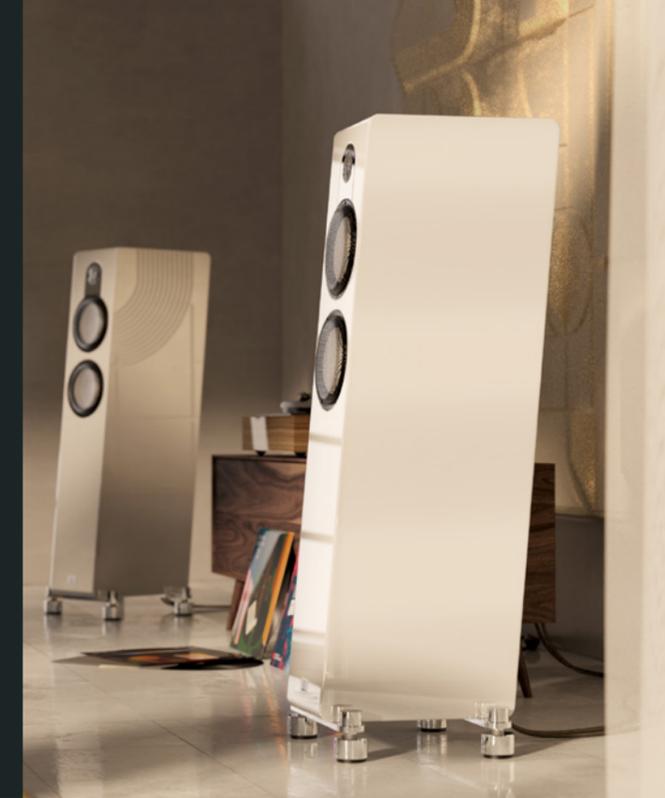

Parker Quintet can be upgraded to Diamond Edition, featuring a pure Diamond tweeter, Jorma Statement internal cables, more advanced crossover components and improved terminals.

PARKER Trio

Parker Trio is a 2.5-way floorstander that's perfectly suited for any living space. Our custom-designed drivers work seamlessly with the advanced multi-diverse crossover technique to deliver power and control. The speaker's design and resonance-free cabinet blend seamlessly with any décor, while the cutting-edge technology inside ensures a dynamic and crystal-clear sound, with enviable bass response.

FEATURES

- Multi-diverse crossover technique
- Passive radiators
- All custom drivers
- Jorma cables
- High sensitivity
- M-board multi-layered cabinet
- Marten Isolators

See technical specifications for finishes

UPGRADE

Parker Trio can be upgraded to Diamond Edition, featuring a pure Diamond tweeter, Jorma Statement internal cables, more advanced crossover components and improved terminals.

PARKER Duo

Parker Duo is a 2-way stand speaker that is built on our reputation for outstanding bookshelf models. It's designed for extreme resonance reduction, with all custom drivers, passive radiators and a superior cabinet design. It delivers sound that is full of power, with deep and controlled bass, it's optimised for performance in large living spaces.

FEATURES

- Multi-diverse crossover technique
- Passive radiators
- All custom drivers
- Jorma cables
- High sensitivity
- M-board multi-layered cabinet
- Marten Isolators
- Custom stand (optional)

See technical specifications for finishes

UPGRADE

Parker Duo can be upgraded to Diamond Edition, featuring a pure Diamond tweeter, Jorma Statement internal cables, more advanced crossover components and improved terminals.

OSCAR Series

The Oscar series was created to meet the demand for a reasonably-priced Marten speaker, without sacrifice to our renowned sound and quality. To achieve this we went back to the drawing board. To keep the same Marten sound we designed brand new drivers, allowing more control of the details and the ability to redesign the build for optimal performance.

The result is a sound that is open and dynamic, with remarkable clarity. And a controlled and powerful bass response that surprises most.

OSCAR Trio

Oscar Trio presents the Marten sound at a more accessible price point: a significant milestone. Our chief designer Leif Olofsson created custom technology to achieve a level of performance worthy of our name. Oscar Trio delivers exceptional dynamics, a high resolution soundstage, and bass that is fuller and deeper than you might expect.

FEATURES

- Custom designed drivers
- True Marten sound
- 2-way
- Competitive price-point
- Magnetic cover (optional)
- Marten Isolators (upgrade)

OSCAR Duo

Built from the ground-up, Oscar Duo sparked a design rethink to deliver Marten sound with new technology - bespoke drivers were created to make this possible. Oscar Duo is an exceptional, all-round living room speaker. With sound so solid and tight, it fills a room and feels like a speaker with a much larger footprint.

OUR STORY

In 1998, Leif Mårten Olofsson founded Marten in Sweden, but the company's history goes back much further. Leif's grandfather, Josef Olofsson, crafted violins modelled after Stradivarius in the early 1900s. An instrument that was also played by Mårten Larsson, Leif's maternal grandfather.

Leif's passion for speaker design began in the 1970s, when he made his first speakers in the family home. A hobby which keenly interested him from an early age. After Leif obtained his degree in electrical engineering, he started a career in kitchen design. On the side, he continued his true passion for speakers. He developed formative designs that would later serve as sketches for what would become Marten speakers.

Starting with the original Mingus model, Marten's product line has expanded, growing stronger with each iteration. The company's success and respect have steadily grown over time, fueled by Leif's dedication to creating speakers that accurately reproduce the truth and beauty of natural sound. Leif's desire to hear music as it is in real life, free of distortion or artificial colouring, is at the core of the Marten ethos.

This vision has driven the company's product design and development from the beginning and continues to do so today. Despite its growth and success, Marten remains a family business, with Leif and his brothers, Jörgen and Lars Olofsson, at the helm.

JOSEF OLOFSSON RECREATED BY AI

STUDIO AND RECORD LABEL

Marten speakers have always been designed with a deep appreciation for music and a commitment to delivering it in its truest form.

In 2013, the company took this passion to the next level by building its own recording studio at its offices in Sweden, with the reference model Coltrane Supreme 2 as its inspiration. This dual microphone studio allowed Marten to create its first recording album, Supreme Sessions, which bridged the gap between live music and the home listening experience.

Coltrane Supreme 2 represented a new direction in Marten's design strategy, with the recording studio serving as a crucial component in the development process.

Thanks to this studio, Marten has been able to produce high-fidelity recordings, which it has released on its own record label, Marten Recordings. The label has worked with a variety of talented artists, including Rhythm Art Duo, Matti Ollikainen, and Duo Granmo Berg, with all recordings taking place in Marten's state-of-the-art studio in Gothenburg.

“We’ve been working in the field of high-end for more than 25 years, but even with all that experience, I think we can still find ways to improve”

A handwritten signature in cursive script that reads "Leif Olofsson".
