**Nagra HD AMP**

Nagra is setting a new reference in sound playback with a new breed of products. A whole new family is in development in our laboratory and is called HD for high definition.

The first amplifier is simply named Nagra HD AMP.

The Nagra HD AMP is a superlative product. It is a monoblock design inspired by the shape of the Nagra VPA and is able to deliver a transparent and perfect 1000 W rms power into low impedance, where you actually need them.
