New power amplifier – MSA Mosfet Stereo Amplifier.

---

### Features

The MSA footprint is the same as the compact Nagra range, CDC, PL-L... it is a stereo power amplifier, that uses a pair of MOSFET transistors as output devices. It delivers 60 W per channel, it features a Nagra power meter, and is bridgeable. It has balanced inputs on XLR, WBT speaker connectors, an Auto start/stop function, sensitivity of 1 or 2 V (set by a switch on the rear panel). It has an optional cover that hides the heat sink.

### Availability

The delivery is scheduled for end of November with limited number of pieces (50 pieces) available this year. More units will be available in January 2010.

### Price

The retail price in Euro is 8'500.- ,

### Optional cover

A cover is available as an option.

### Power supply

To improve its performance, the MSA comes with three different internal power supplies. 230V, 115V and 100V.

### Heat sink

To make the most of the limited surface area, the heat sink covers the entire top of the amplifier. It is machined from a solid 10 kg block of aluminum, and after machining is completed, its weight reduced to 3.5 kg!
