ION

The Electron Audio ION Hybrid Power Amplifier
A synthesis of cutting edge audio technology
The ION power amplifier presents a unique fusion of
sophisticated vacuum tube amplification with the power of class
D power yet it's not simply a graft of a tube preamp onto a
class D power amplifier. Instead, the tube stage sets up the
class D power converter which offers amplification for the
delicate input signal, and also lowers the class D's switching
D modulator driving a high efficiency power stage. The resulting
amplifier circuit communicates intelligently with a high
efficiency switching power supply which provides
high efficiency power to the class D, comparing favorably
with the most expensive class D amplifiers. The result is
lively sounding, wide dynamic range, off very low
impedance.

Electron Audio ION hibridno izlazno pojačalo
Sinteza 110 godina moderne audio tehnologije
Izlazno pojačalo ION je jedinstven spoj sofisticirane
audio tehnologije vakuumne izlazne staze i klasi

D pojačavača. Umesto toga, staza D
preostavlja napajanje u klasi D, omogućavajući
kompleksnu regulaciju i snagu izlaznog
preostavljača u klasi D, omogućavajući
modulaciju klasi D i klasi D. To omogućava
ljudskom uhoj da čuje razliku između klasi
