

## DAC30 LAUNCHES NEXT WEEK!

We will begin to ship DAC30 first week September...

### Why you should buy the DAC30:

The DAC30 is a fully balanced specialised standalone DAC designed to get the very best from computer audio. If your customers use their computer hard drive or NAS as their main source for music, the DAC30 will deliver the best audio fidelity.

Use the DAC30 for audiophile performance from a computer. Use the MM30 media module with its Internet connection and control apps as a high quality network player.

The DAC30 will also upgrade existing high-end CD players like the CD31 through its balanced AES/EBU digital input, and will transform the sound of SAT boxes or games consoles.

The DAC30 offers the processing engine of the celebrated Primare BD32 universal player, high-end, low-noise circuit layout and balanced XLR outputs for connection to a high quality music system.
