

P R I M A R E

THE SOUND AND VISION OF SCANDINAVIA

New Product Announced

I15 integrated amplifier with optional MM phono stage

I15 integrated amplifier, features 60 watts of power per channel, and an optional moving magnet phono preamplifier module, **MM15**, available for installation at any time.

I15 utilises the same Hypex all analog class D power module as used in the EISA award winning I15 Prisma, but without the need to provide power to the digital to analog conversion stage and network player found in the I15 Prisma, we have been able to reconfigure the power supply to allow I15 to perform with even greater drive and detail. MSRP: I15 €1250 / I15 MM €1500 / MM15 €300
