THE SOUND AND VISION OF SCANDINAVIA

New Primare Products

The I25 joins the I35 UFPD 2 family

I25 Prisma is an integrated digital and analog music system control center and amplifier – capable of providing exemplary performance whether the source is analog or digital, stored or streamed, wired or wireless.

The latest iteration of Primare's now iconic integrated amplifiers, the I25 Prisma joins the I35 Prisma as the first to use the new UFPD 2 power system, a radical reworking of Primare's award-winning UFPD all-analog Class-D technology.

Providing 100 watts into 8 ohms of absolutely linear amplification across the entire audible bandwidth, the I25 Prisma delivers naturally fast, clean and agile sound with an unprecedented ability to bring music to life. In addition, the I25 Prisma includes a full-featured DAC stage, as well as Prisma connectivity and control technology.

Also available is the I25, without DAC or Prisma modules, as well as the I25 DAC, with DAC but without Prisma module. In either case, both the DAC and Prisma modules can be added at a later date to meet changing system requirements.

Add in the available feature options found in our CD35, CD35 Prisma, or DD35 models and the system building opportunities allow for the perfect solution for both new and existing systems.

MSRP - I25 Prisma €3500 / I25 DAC €3100 / I25 €2500

I35 Prisma, I25 Prisma, and I15 Prisma
