

Primare NP5 Prisma Press Release

7 October 2019

Primare announces NP5 Prisma network player to ship end of October 2019

NP5 Prisma is a clever little device that provides Primare's Prisma network player technology to virtually any system with a digital input.

Incorporating all the functionality found in their latest award winning Prisma enabled models, including AirPlay 2*, Bluetooth, Chromecast built-in, Roon Ready*, Spotify Connect, in addition to network connected hard drive control, **NP5 Prisma** also allows for volume adjustment and input selection for previous Primare models with RS232 inputs, all using the comprehensive **Prisma** application.

Specifically designed to be small enough to slip inconspicuously into any system setup, **NP5 Prisma** can be used with any product with a digital input, both stereo and multi-channel, Primare or other brands, to provide full Prisma connectivity and control, making it the network player for anyone and any system.

"**NP5 Prisma** represents the best solution for incorporating the latest stored and streamed digital media playback features for owners of any of our past products incorporating the company's initial streaming technology." states Siemen Algra, Primare general manager. "We wanted to provide our existing customers, some who have been using our streaming technology launched eight years ago, with a significant update, one with all the amazing features our current Prisma platform can provide, so we have developed both the NP5 Prisma and the associated update program."

The NP5 Prisma Update Program offers owners of **PRE60, NP30, I32 MM30, and PRE32 MM30** models an **NP5 Prisma** .

Features shortlist:

- AirPlay 2*
- Bluetooth
- Roon Ready*
- Spotify Connect

- Chromecast built-in
 - Over 160 streaming services available, including Roon endpoint
 - Simplified network connection using Google Home app
 - Voice control through Google Home devices and Google Assistant
- Multi-room/multi-zone connection and control through a variety of platforms: AirPlay 2, Spotify Connect, Chromecast built-in, and Prisma.
- Wired (LAN) and Wireless (WLAN) connection

- RS232 control connection with included RS232 cable allowing for Prisma APP control on past Primare models: volume control; mute; power on/off; input selection.

About Primare

Primare's goal is to provide the best possible experience for the greatest number of people. The current Prisma line was created to allow anyone in the household to effortlessly explore, discover, and share the deeply satisfying experience of high-performance playback – whether the source is analog or digital, audio or video, wired or wireless, stored or streamed - providing connectivity and control using Prisma technology with associated applications and devices familiar to everyone.

*It is anticipated that NP5 Prisma will launch with AirPlay 2, but if not will come in future update, with Roon Ready capability coming soon afterward in a subsequent update.
