THE SOUND AND VISION OF SCANDINAVIA

New Product Announced

R35 MM/MC Phono Preamplifier

R35 MM/MC phono preamplifier is our most sophisticated phono stage. R35 features RCA and XLR output, a fully shielded power supply, as well as very flexible gain and input loading adjustments allowing for ideal system matching for virtually any MM or MC phono cartridge. It has not been an easy task to replace the venerable R32, but with greater gain, lower noise, and increased detail we believe the R35 is a worthy successor. MSRP: TBA
