

P R I M A R E

....did its homework!

There are two ways to play Spotify with your MM30 / NP30: a good sounding one and a convenient one. In general we recommend a Premium account for superior sound compared to a free subscription.

Good sounding

1. Connect your PC or laptop directly with a good quality cable to the MM30 or NP30 using the USB-B connection.
2. Install Spotify's app called **REMOTELESS** and you have the same UI as if you would use on your PC or laptop.
3. Make sure to install REMOTELESS-helper on your PC or laptop.

Convenient over WiFi (iOS only)

1. Install the app called **MUSICFLOW** on your iOS device.
2. Select your Primare unit in the MusicFlow using BLUE button.
3. Leave the MusicFlow app and go to the Spotify app and start playing.
