**REL**  
ACOUSTICS LTD.

**Serie S™ is the most significant advance for REL in a decade; strong words, but true. S marks the full realization of modern REL imperatives:**

- 1 Superlative speed by virtue of REL's unique input and filter topology.
- 2 Effortless Longbow™ wireless connectivity (optional).
- 3 Superalloy™ drivers featuring a seamless, continuous 1-piece aerospace grade T-6063 alloy cone structure, with up to 48mm Xmax.
- 4 Instrument-grade cabinet bracing used throughout the range for quieter, more dynamic bass.
- 5 Thoroughly upgraded mechanical design features resulting in both a more beautiful appearance and upgraded performance.
- 6 Limitless™ limiters provide up to twice as much output prior to onset of audible stress.
- 7 Comprehensive upgrade to REL's already class-leading design language.
